**Private Health Insurance Ombudsman**

The Hon. Nicola Roxon MP  
Minister for Health and Ageing  
Parliament House  
CANBERRA ACT 2600

Dear Minister

Section 253-50 of the *Private Health Insurance Act 2007* requires me to provide a report of the Ombudsman's operations for each financial year.

I have pleasure in submitting to you for presentation to the Parliament the Private Health Insurance Ombudsman's Annual Report for the period 1 July 2010 to 30 June 2011.

This report has been prepared in accordance with the Finance Minister's orders and Government guidelines for the preparation of annual reports and financial statements.

Yours sincerely

Samantha Gavel  
Ombudsman  
26 September 2011

## Introduction

The Private Health Insurance Ombudsman (PHIO) protects the interests of consumers in relation to private health insurance. PHIO carries out this role through its independent complaints handling service, by identifying underlying problems in the practices of private health insurers or health providers relevant to the administration of private health insurance, and by encouraging health insurers to continuously improve their own complaints handling practices.

PHIO provides consumers with information and advice regarding private health insurance and produces and publishes a range of tools for consumers, including the consumer website [www.privatehealth.gov.au](http://www.privatehealth.gov.au). PHIO also provides advice to the Australian Government about issues affecting consumers in relation to private health insurance.

The activities of the office include:

- provision of an independent complaints handling service for resolving individual complaints and identifying the underlying systemic issues driving complaints;
- advice to industry and government about industry practices and issues of concern to consumers identified through our complaints handling and consumer enquiry services;
- consumer education and advice, through the publication of brochures and fact sheets and our two websites: [www.phio.org.au](http://www.phio.org.au) and [www.privatehealth.gov.au](http://www.privatehealth.gov.au);
- publishing the annual *State of the Health Funds Report* to provide comparative information about the performance and service delivery of all private health insurers; and
- mediation between health insurers and

Samantha Gavel – Ombudsman

healthcare providers in order to resolve disputes that may impact on consumers' entitlements under their private health insurance.

The activity of the office increased in 2010-11, particularly in relation to complaints handling, with a significant increase in overall complaint numbers. At the same time, the number of higher level complaints requiring more detailed investigation remained similar to last year. Pleasingly, in spite of this increased workload, consumer satisfaction with PHIO and its services remained high and we met or exceeded all of our Key Performance Indicators.

Highlights for the year included:

- the official launch of the major updates made to the [www.privatehealth.gov.au](http://www.privatehealth.gov.au) website;
- positive feedback from consumers in relation to the updated site, with 85% of those

surveyed being satisfied with the information available on [www.privatehealth.gov.au](http://www.privatehealth.gov.au);

- the PHIO Industry Seminar which was held in March 2011;
- the release of a discussion paper relating to the industry consultation on Acute Care Certification issues;
- continuing high level of customer satisfaction with our complaints handling service, with 88% of those surveyed reporting they were satisfied or very satisfied with the service; and
- working with a number of individual insurers to improve customer service and their internal processes to reduce complaints about particular issues causing complaints from their members.

### Health Insurance Complaints

PHIO received 3,070 complaints during 2010-11, which was an increase of 17% on the previous year. This jump in overall complaint numbers represents quite a radical change from the pattern of the past five years, which has seen only small but consistent increases in the number of complaints to PHIO. These previous increases were within expectations, given that fund membership levels also increased during that time.

The increase was most notable in the second half of the year. PHIO usually experiences a higher number of complaints at this time of year as fund premium increases are notified to members in March and April. There also tends to be more focus on private health insurance by the media at this time, because of the public release of the premium increase approvals by the Minister for Health and Ageing. Most people who contact PHIO at this time are not usually complaining about their premium increase per se, so it seems that the higher profile of health insurance at this time of year acts as a catalyst for people who may be experiencing a problem with their health insurance to contact their fund or PHIO about it.

In reviewing our complaints data, the issues in 2010-11 where there was an increase in complaints include level of cover, fund rule changes and general service issues. The increase in complaints about these issues is not across all insurers, but is generally confined to two or three of the larger insurers, who made changes to their products last year that affected large numbers of members. For example, one larger insurer changed the restrictions on a number of its policies to exclusions with effect from 1 July 2010 and also made changes to excesses on some policies later that year. In addition, another large insurer moved some of its major dental treatments into the general dental category, which reduced the benefits members received and also made some changes to ambulance policies. This insurer also had a higher level of complaints from members about the application of the Pre-Existing Condition rule and PHIO has been working with that fund to improve processes and reduce complaints about this issue. The impact of these issues led to a higher level of complaints to PHIO from members of these two funds.

As has been noted in previous reports, developing policies with restrictions and exclusions, or adding them to existing policies, assists funds in managing premium costs and

meeting demand from consumers for more affordable policies.

Legislation requires that if a fund makes a detrimental change to a policy, it must inform members in advance of the change. The information the fund provides in its letter to members is very important in ensuring members understand the change and its impact on them. This enables the member to accept the change, or to look at other policy options if the change means their policy no longer meets their needs.

In the past, PHIO has focused on ensuring the information sent to members about detrimental rule changes is accurate and contains the information members need to know in order to make informed decisions about their cover. To assist with this aspect, PHIO encourages funds to send copies of their letters about such changes to PHIO before they go out.

It is disappointing to note that some of the letters about detrimental rule changes that were sent in 2010 did not contain adequate advice about changes to policies. Copies of these letters were not provided to PHIO for review, which meant we were not able to advise funds to include more specific information to assist members in understanding the impact of the changes. This resulted in higher levels of complaints from members of these funds to PHIO. PHIO has had a number of discussions with the funds concerned and they have agreed to improve their letters, as per PHIO's recommendations, in future. We will be closely monitoring this issue in the coming year and requesting that funds do follow up mail-outs and communication campaigns if the information provided to members about detrimental changes is not sufficient. We will also require funds to remedy any complaints that arise from the provision of inadequate information to members.

It is important to note that even where a fund has worked to ensure that a letter does contain the information members need to know about

a change to their cover, complaints to the fund and to PHIO can reveal issues that are not well understood by members. For example, one fund removed obesity/lap band surgery from one of its policies last year. A number of members on the policy who had already had a lap band fitted understood they would no longer be covered for this surgery in future, but did not think they needed to upgrade their cover to one which covered this surgery because they had already had the procedure.

What members did not realise was that the item number for lap band surgery is the same, regardless of whether the lap band is being inserted, adjusted or removed. So when a small number of members needed to have their lap band removed or adjusted, they found they were no longer covered for this. In this case, the fund agreed to take a flexible approach to complaints and to write to members who had previously undergone lap band surgery advising them they needed to upgrade their policy if they might need an adjustment or removal of their lap band in future.

There were 716 higher level complaints investigated by PHIO in 2010-11, which was a small increase on the 684 higher level complaints investigated last year. It was pleasing to see that although complaint numbers increased overall, there was only a small increase in the number of higher level complaints requiring investigation by PHIO. This suggests that insurers were handling the complaints we referred back to them well, so that these complaints did not require formal investigation by PHIO. This is a positive indicator for the industry and for the work PHIO does with insurers to improve their internal complaints handling practices.

### Out-of-Pocket Costs

Consumer surveys regularly show that consumers are more likely to be dissatisfied with their health insurance when they encounter out-of-pocket gaps for services they receive.<sup>1</sup> In early 2011, a healthcare

<sup>1</sup> See for example the Ipsos Report on Health Care and Insurance 2009 (available to subscribers only).

provider introduced a compulsory fee for incidental services at all of its hospitals. The fee was set at \$25 for overnight patients and \$15 for day procedure patients. According to the healthcare provider, the fee was intended to cover the cost of access to Wi-Fi technology, business centres and Foxtel television channels by patients and visitors. For patients admitted for day procedures, it also covered the provision of a robe and bag to store their belongings, which they could take home.

Almost immediately on the introduction of this fee, PHIO began to receive complaints from patients who could not, or did not wish to use the services covered by the fee. These patients indicated in their calls and letters to PHIO that they believed it was unfair for the provider to impose the fee on all patients, regardless of whether they wished to use the services covered by the fee. A number of health funds also complained to PHIO about the fee on behalf of their members.

PHIO raised these complaints with the healthcare provider. In its response to PHIO, the healthcare provider indicated it had made a significant investment in new technology at its hospitals, bringing them to a standard that private patients expect, and that these costs needed to be recouped via the compulsory incidentals fee, as they were not payable by health funds.

The provider also indicated its practice is to take all reasonable steps to advise patients of the fee prior to admission and considers that, in general, patients have a choice whether to incur the fee in choosing whether to be admitted to the hospital. The fee does not apply in all circumstances, and in cases of re-admission to hospital, the fee is charged once in a twelve-month period.

The healthcare provider recently advised it would no longer charge the fee for day-stay patients. PHIO believes this is a positive development. At the time of going to print,

however, the fee is still in place for all overnight patients. It remains PHIO's view that the fee should only be charged to patients who wish to incur this cost and it is to be hoped that the provider will review its decision to impose this fee on all patients, regardless of whether they wish to use the services it covers.

PHIO is continuing to receive complaints about this issue and is seeking advice from a number of sources in resolving this matter.

### Industry Developments

A number of Brisbane-based insurers were affected by the Queensland floods in January 2011. These funds were able to put business continuity management plans into practice and there was minimal disruption to members. A number of funds, in consultation with the Private Health Administration Council (PHIAC) and the Department of Health and Ageing, put arrangements in place to assist members affected by the floods.

The Code Compliance Committee for the private health insurance industry Code of Conduct conducted a review of the Code during 2010-11. PHIO was given the opportunity to comment on improvements to the Code. The focus of PHIO's comments was on improving information for members when they join a fund; ensuring funds meet the Best Practice Guidelines for Pre-Existing Conditions and facilitating the provision of Transfer Certificates to streamline processes for transferring members. These suggestions were incorporated into the Code of Conduct.

The Australian Government announced funding in the 2011-12 Budget for the further development of a Personally Controlled Electronic Health Record (PCEHR) record for all Australians who choose to have one. There is the potential for this initiative to provide significant benefits for consumers, particularly those who are suffering from chronic conditions, provided that appropriate privacy

and security controls are put in place.

As PCEHR data is sensitive personal and health information, the security of the information is paramount to ensure trust and participation by consumers and health care providers. Also important is the accuracy of the information, including the ability to correct information; secure back-up of data; and to limit access to appropriate people.

The aspect of the project of particular relevance to private health insurance consumers is the recognition of the public and private mix in relation to healthcare delivery and services. Participation by private (and public) providers will be encouraged and supported, and consumers will be able to use their PCEHR across public and private health care providers, where providers have chosen to participate.

### Consumer Information and Advice

PHIO provides a number of brochures for consumers on issues identified through our complaints as areas where consumers need additional information. These include brochures on Waiting Periods, Doctors' Bills, Portability of Membership, and Choosing a Health Insurance Policy. During the year, two of our most popular brochures, "Making a Complaint" and "Health Insurance Choice" were translated into the six most commonly used community languages in Australia.<sup>2</sup>

PHIO also provides a number of consumer Fact Sheets on issues that cause complaints or are the subject of regular questions from consumers. These include Fact Sheets on Obstetrics and Pregnancy, Informed Financial Consent, Restrictions and Exclusions, and Premium Increases.

These brochures and Fact Sheets are available for viewing and/or downloading at [www.phio.org.au](http://www.phio.org.au) or can be obtained in hard copy by contacting PHIO on 1800 640 695.

PHIO also provides an information and advisory service to consumers via the "Ask a Question" feature on the [www.privatehealth.gov.au](http://www.privatehealth.gov.au)

[www.phio.org.au](http://www.phio.org.au) website, or by contacting PHIO by telephone on 1300 737 299 during business hours. These services enable consumers to obtain quick answers to questions they may have about private health insurance. The most common questions received in 2010-11 were about Lifetime Health Cover, the Medicare Levy Surcharge and Overseas Visitor cover. This service is separate from our complaints handling service, which is available through PHIO's complaints hotline on 1800 640 695 or PHIO's e-mail complaints form available at [www.phio.org.au](http://www.phio.org.au).

In addition, PHIO has adopted a process of surveying its clients on an on-going basis, rather than a yearly basis. The main advantage of this is the immediacy of the feedback we obtain from complainants, which allows us to address any concerns in a more timely manner.

### Consumer Website [www.privatehealth.gov.au](http://www.privatehealth.gov.au)

PHIO undertook a major review and refresh of the consumer website [www.privatehealth.gov.au](http://www.privatehealth.gov.au)

<sup>2</sup> Source: Australian Bureau of Statistics; brochures available in Arabic, Chinese, Greek, Italian, Spanish and Vietnamese

gov.au in mid-2010. Updates to the site were informed by consumer focus testing, as well as feedback received through the website survey and the "Ask a Question" feature.

New features of the updated site include an improved design and location of information; an updated Lifetime Health Cover calculator and information about average dental charges by state.

The most important feature of the updated site was a new comparison search feature that enables consumers to compare health insurance policies across all 37<sup>3</sup> registered health insurers. It is the only independent source of this information for consumers in Australia. The new comparison search feature makes it easy for people to compare the different features of hospital and general treatment policies and provides consumers with a level of transparency about the differences between policies that has not previously been available to them. This will assist consumers in choosing policies that will better meet their needs from the many options available to them.

The new site was formally launched in November 2010. Feedback from consumers in relation to the updated site has been very positive. A recent survey of the site's

use shows that consumers appreciate the improved design and location of information. More information about the website refresh is contained in the body of this Annual Report.

A significant challenge for the office is ensuring consumers are aware of the site and its resources. The launch of the updated site provided an opportunity to profile the site in the media and PHIO works to take advantage of any opportunities available to publicise the site. This includes regular contributions to newspaper articles and other publications. It also includes strategic linking to sites that can drive traffic to the site; some of the sites PHIO has linked with during the year include the Australian Taxation Office and the HealthInsite website. Both of these sites receive significant numbers of visitors who will now be able to access [www.privatehealth.gov.au](http://www.privatehealth.gov.au) from these sites quickly and easily if they are looking for information about private health insurance.

In the coming year, we will continue to refine and improve the site to ensure it continues to meet consumers' needs for high quality, independent information about private health insurance. This will include improvements to the Agreement Hospital locator and a set of online tutorials to assist consumers in using the site and understanding private health insurance.

### Acute Care Certification Consultation

PHIO has been working with State and Territory health departments and private health insurers to develop a consistent national approach to certification of long stay private patients in public hospitals. The consultation process has involved listening to both parties' views and concerns, gaining an understanding of the assumptions underlying them and collecting and analysing data measuring the scope of problems with the current system. A Discussion Paper was released to stakeholders for comment on 18 February 2011. Following receipt of comments on the Paper, PHIO will continue to work with all parties to resolve the issues identified in the Paper.

### PHIO Industry Seminar

Following on from the industry workshops conducted in 2009-10, PHIO held an industry seminar in March 2011. The aim of the seminar was to bring together industry stakeholders and PHIO staff members to focus on consumer issues in private health and best practice approaches in dealing with complaints. A series of speakers discussed a number of topics including Dr Mark Sinclair from the Australian Society of Anaesthetists on the topic of "Anaesthesia and Informed Financial Consent"; Chris Wheeler, NSW Deputy Ombudsman on the topic of "Complaint Handling for Better Outcomes"; and Anna Wise from the Consumers' Health Forum on the topic of "Private Health Insurance – What Consumers Want".

### Corporate Governance

PHIO relocated its office to Level 22, 580 George Street, Sydney in July 2010. The new office is an appropriate size for staffing needs for the next 5 years, as well as addressing security, maintenance, access and energy efficiency requirements that were not being met in the previous premises.

In line with the Australian Government's commitment to promoting reconciliation with Indigenous Australia, PHIO developed a Reconciliation Action Plan for the office, which is available for viewing at [www.phio.org.au](http://www.phio.org.au).

Reforms to the *Freedom of Information Act 1982 (Cth)* (the FOI Act) in November 2010 introduced fundamental changes to the way information held by government is managed and accessed by members of the public. Some of the major changes include encouraging a pro-disclosure culture, the establishment of the Office of the Australian Information Commissioner and reforms to the ability to access information under the legislation.

Under these reforms, Commonwealth Government agencies are required to publish a broad range of information on their websites,

and to make it available through online access where possible. In line with these requirements, PHIO has developed an agency plan, organisational chart and disclosure log which are available for viewing at [www.phio.org.au](http://www.phio.org.au).

PHIO has always had a policy of openness with the information it holds, with complainants being able to request information held about their individual complaint directly from PHIO, free of charge.

### The Year Ahead

In the coming year, PHIO intends to continue its development of the consumer website [PrivateHealth.gov.au](http://PrivateHealth.gov.au), to ensure it continues to meet consumers' needs as an independent source of reliable information about private health insurance.

PHIO will also focus on ensuring its printed information is available for those consumers who do not have access to the internet. This is particularly relevant to consumers who live in regional and remote areas.

PHIO also intends to hold a series of industry workshops to assist insurers in identifying the causes of complaints through root cause analysis, to assist them in improving their processes and reducing complaints from their members.

PHIO will work with insurers to reduce complaints in those areas that have caused higher levels of complaint to the PHIO during 2010-11.

<sup>3</sup> Number of registered health insurers as at 30th June 2010, according to the PHIAAC Annual Report of the Operations of the Private Health Insurers, page 9

## Introduction

The Private Health Insurance Ombudsman is a statutory agency established under the Private Health Insurance Act 2007.

The role of the Ombudsman is to protect the interests of consumers in relation to private health insurance.

## Functions

The Ombudsman is an independent body that resolves problems about private health insurance and acts as the umpire in dispute resolution at all levels within the private health industry.

A summary of the functions of the Ombudsman, as provided by section 238-5 of the *Private Health Insurance Act 2007*, are to:

- deal with complaints and conduct investigations;
- publish aggregate data about complaints;
- publish the *State of the Health Funds Report*;
- make recommendations to the Minister or Department of Health and Ageing;
- report to the Minister or the Department about the practices of particular private health insurers, private health providers and private health insurance brokers or other related parties;
- collect and publish information about complying health insurance products (i.e. manage the consumer website privatehealth.gov.au);
- promote a knowledge and understanding of the Ombudsman's functions;
- undertake any other functions that are incidental to the performance of any of the preceding functions.

## Who Can Make a Complaint?

Generally, anyone can make a complaint, as long as the complaint is relevant to private health insurance. The objective of the Private Health Insurance Ombudsman is to "protect the interests of people covered by private health insurance". The Ombudsman will look into complaints that concern private health insurance consumers, but the office may not investigate complaints of a purely commercial nature that do not have significant impact on the rights of consumers.

## Persons Against Whom a Complaint May Be Made

Complaints may be made against private health insurers, health care providers and private health insurance brokers.

## What Can the Ombudsman Do With a Complaint?

The Ombudsman is able to deal with complaints by:

- referring the complaint to the health insurer, broker, hospital or provider, with a request to report to the Ombudsman with its findings and any action it proposes to take. If the Ombudsman is not satisfied with the explanation or proposed action, the Ombudsman may further investigate the complaint and make a formal recommendation;
- mediation;
- referring the complaint to the Australian Competition and Consumer Commission; and
- referring the complaint to any other appropriate body.

The Ombudsman is also able to investigate the practices and procedures of health insurers,

**Rosie Edwards, Alison Leung, Ursula Schappi, Joanna Wong, David McGregor, Samantha Gavel, Damien Maynard, Leonie Hull, Jim Robertson, Kaylie Blyton, Kate Hocknull, Henny Oentojo, Hilary Bassingthwaighte, Tracey Salkeld, Amelia De Gregorio**

health care providers and health insurance brokers, and the Minister is able to request the Ombudsman to undertake such an investigation.

## What Happens at the End of a Complaint or Investigation?

The Ombudsman is able to recommend that:

- health insurers, health care providers and health insurance brokers take a specific course of action in relation to a complaint; and
- a health insurer changes its rules or practices.

In certain circumstances, the Ombudsman may request that a health insurer, health care provider or health insurance broker provide a report on any action taken as a result of the Ombudsman's recommendations.

Section 241-35 of the *Private Health Insurance Act 2007* provides various grounds for the Ombudsman to decide not to deal with a complaint. These include:

- if the complainant has not taken reasonable steps to negotiate a settlement;
- if the complainant is capable of assisting the Ombudsman in dealing with the complaint but does not do so on request;
- if the subject of the complaint has dealt, or is dealing, adequately with the complaint or has not yet had an adequate opportunity to do so;
- if the complainant does not have a sufficient interest in the subject matter of the complaint;
- the matter is trivial, vexatious or frivolous; or the complaint was not made in good faith;

- if the Ombudsman or another organisation has already been dealing with, or dealt with, the complaint adequately; or
- if the complaint is mainly about commercial negotiations and it is not appropriate to deal with the complaint.

## How the Ombudsman's Staff Resolve Complaints

The Ombudsman deals with most complaints by telephone, fax and e-mail. Where complainants have not made a sufficient attempt to resolve their complaint with their health insurer or provider, staff will usually refer complainants back to these parties in the first instance. Staff will often refer the complaint themselves in order to provide a faster and more convenient service to the complainant.

Where complaints are complex, or where formal contact with the health insurer has been unable to resolve the problem, the Ombudsman will write to the insurer or provider seeking further information.

Staff members regularly keep complainants informed of developments about complaints, usually by telephone. The Ombudsman will advise complainants of the outcome of a complaint lodged with the Ombudsman by phone, letter or e-mail.

Complainants may seek a review of their case if they are not satisfied with the response, or seek further clarification of the reasons for a decision.

## Performance Indicators

The 2010-11 Portfolio Statement for the Health and Ageing Portfolio outlines the Ombudsman's program to promote public confidence in private health insurance. The program's Key Strategic Directions are:

- to ensure the protection of the interests of insured persons;
- to further improve the quality and accessibility of information available to consumers on private health insurance products; and
- to provide private health insurance consumers with an efficient and effective complaints handling service.

The following is a summary of performance outcomes against the program's formal performance indicators in 2010-11:

Qualitative Deliverable	2010-11 Reference Point or Target	2010-11 Result
Improve the quality and accessibility of private health insurance information		
Publish the annual <i>State of the Health Funds Report</i>	The <i>State of the Health Funds Report</i> is published by PHIO by 31 March 2011	Report published on 31 March 2011
Manage the private health insurance consumer website (www.privatehealth.gov.au)	Regular and timely updates of the website to ensure information is accurate and up-to-date	Website regularly updated in response to industry changes and issues of concern to consumers
Complaints handling service		
Effective complaints handling service	Service effectiveness as measured by client survey	88% of surveyed clients satisfied or very satisfied with service; 88% would recommend PHIO to others.

Qualitative Deliverable	2010-11 Budget Target	2010-11 Result
Protect the interests of health insurance consumers		
Number of high quality and timely advisory services, policy advice, and submissions and reports, measured by stakeholder feedback.	≥12	14
Complaints handling service		
Number of publications on PHIO complaints handling activity	6	6

## Key Performance Indicators

Qualitative Indicators	2010-11 Reference Point or Target	2010-11 Result
Protect the interests of health insurance consumers		
Production of high quality and timely advisory services, policy advice, submissions and reports	Positive stakeholder feedback on information products	Consumer brochures were sent directly to consumers, accessed online, and also distributed by health funds, hospitals and providers, with over 83,000 brochures distributed throughout the year. The consumer website received 311,572 unique visitors throughout the year, an increase of 17% on the previous year.
Improve the quality and accessibility of private health insurance information		
Provision of independent and reliable information to consumers via the private health insurance consumer website (www.privatehealth.gov.au)	Measured by website survey and consumer focus testing which indicates that information provided is viewed as independent and reliable	85% of surveyed website clients satisfied with information and positive feedback from website users

Quantitative Indicators	2010-11 Budget Target	2010-11 Result
Protect the interests of private health insurance consumers		
Percentage of recommendations that have resulted in changes to insurer or industry practices.	75%	Not applicable (sample size ≤1)
Improve the quality and accessibility of private health insurance information		
Number of average daily visits to consumer website	710	1258
Percentage of information products useful or very useful for consumers	75%	95%
Complaints handling service		
Percentage of complaints finalised during the year	90%	97%
Percentage of complaints finalised within one month of receipt	80%	84%
Percentage of clients satisfied with complaint handling service	81%	88%

## Complaints

The Ombudsman received 3070 complaints during 2010-11. This was an increase of 458 complaints (17%) on the previous year.

Of those complaints, 716 were classified as Level 3 Disputes, a 5% increase on the previous year. Level 3 complaints are those where the Ombudsman's staff acts on behalf of a complainant by requesting a report from a health fund or other object of complaint. The report is then reviewed and either closed as a satisfactory response or investigated further.

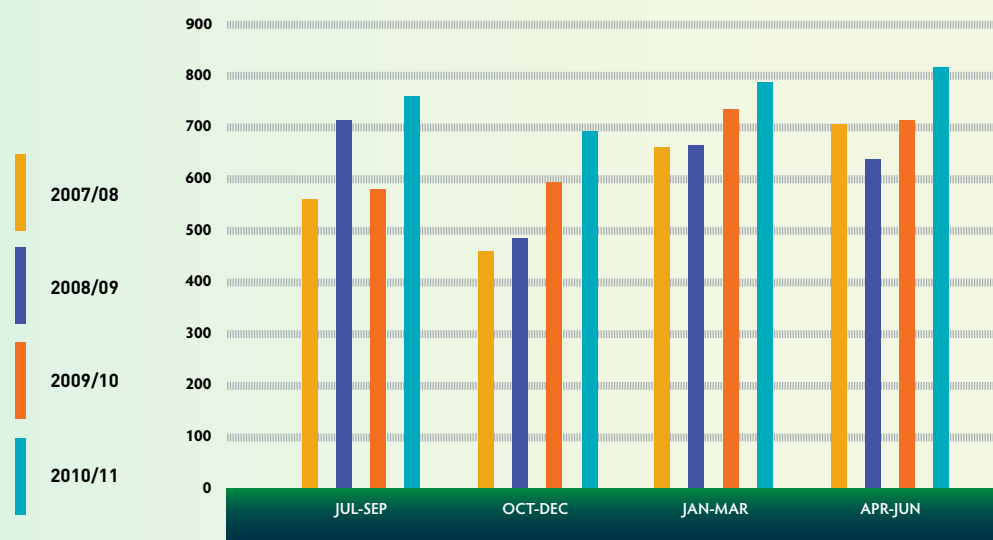

**Figure 1 Total Complaints Received per Quarter**

Figure 1 shows the distribution of complaints over the four quarters of the 2010-11 financial year.

Figure 2 shows the total number of complaints received per year for the last twelve years. The increase in the number of complaints in the 2000-01 year was associated with a large increase in the number of Australians covered by private health insurance following the introduction of the 30% Health Insurance Rebate and Lifetime Health Cover.

The reduction in complaints after 2002-03 is mostly attributable to a decline in complaints about premium increases and improvements to complaint handling processes within the health insurance industry.

### Consumer Enquiries

Enquiries are instances where the Ombudsman's staff provided advice or information, where the matter does not meet the definition of a complaint. In 2010-11, 1216 consumer enquiries were recorded. While this was a 30% decrease on last year's figure of 1757 enquiries, it still far exceeds the figure of 605 enquiries in 2008-09.

The majority of enquiries (1100 enquiries, or 90%) are received via the Ombudsman's consumer website [www.privatehealth.gov.au](http://www.privatehealth.gov.au). Using the "Ask A Question" feature on the website, consumers can contact the Ombudsman by filling out a form. Some of the decrease in enquiries is attributable to the re-organisation of the website in July 2010, which allowed consumers to more easily locate the information they required. (See: Consumer Website section for more information.)

### Recording and Categorisation of Complaints

An approach to the Ombudsman's office is recorded as a complaint when it meets the criteria contained in the *Private Health Insurance Act 2007*. A complaint must be an expression of dissatisfaction with any matter arising out of or connected with a private health insurance arrangement. Complaints can be made by and be concerned with: a member of a health insurer, a hospital, a doctor or other practitioner, a health insurer or health insurance broker.

Complaints dealt with by the Ombudsman range from simple contacts that do not require investigation and can be referred to the service provider for resolution, through to matters requiring mediation or a formal recommendation under the Act. The Ombudsman's complaints categorisation takes account of the following factors:

- type of approach;
- degree of effort required by Ombudsman staff to resolve the matter; and
- any potential sensitivity.

Currently complaints are categorised as follows:

#### Complaint Level 1 (Problems): Moderate level of complaint

Level 1 complaints are dealt with by referring the complainant back to the health insurer, health care provider or health insurance broker which is the object of complaint. This occurs where, in the view of the Ombudsman, the complainant has not made an adequate attempt to resolve the problem or the Ombudsman is able to suggest to the

complainant other ways of approaching the problem. Issues within this category may fall anywhere across the whole complaint range including product description, benefits paid, informed financial consent, pre-existing ailments and service quality.

In 2010-11, 82% of Level 1 complaints were resolved as "Assisted Referrals," where the Dispute Resolution Officer referred a complaint directly to the insurer or service provider on behalf of the complainant. This approach ensures a quicker turnaround time and enables the appropriate person within an organisation to assist the complainant. The Ombudsman's client satisfaction survey indicates that complainants are more often satisfied with the office if assistance is provided by staff members in this way.

If complainants are still not satisfied after their health insurer or healthcare provider contacts them, the Ombudsman can then contact the other party and ask for a report in order to assess the complaint. When this occurs, the complaint is re-classified as a Level 3 complaint.

**Figure 2 Total Complaints Received per Year**

### Complaint Level 2 (Grievances): Moderate level of complaint resolved without requiring a report from the subject of the complaint

Level 2 complaints are dealt with by staff investigating issues of grievance and providing additional information or a clearer explanation directly to the complainant. Complaints within this category generally result from a misunderstanding by consumers of their rights under the policy they have purchased, including concerns about service levels provided by the insurer or provider, price increases, benefit limitations and waiting periods.

The provision of an explanation by the Ombudsman as an independent third party is generally sufficient to conclude the complaint.

### Complaint Level 3 (Disputes): Highest level of complaint where significant intervention is required

Level 3 complaints are dealt with by Ombudsman staff contacting the health insurer, health care provider or health insurance broker about the matter and requesting a formal report. Issues in this category will have previously been the subject of dispute between the complainant and the respondent and not have been resolved. The Ombudsman attempts resolution through conciliation by telephone or in writing. Common

Figure 4 Complaints by Category 2010–11

complaints in this category include pre-existing ailments, lack of informed financial consent, benefits available on transfer of membership, benefits not in accordance with brochure descriptions and contribution errors.

Figures 3 and 4 show the ratio of complaints by level. This year, 2093 complaints were classified as Level 1, 261 as Level 2, and 716 as Level 3. There was a significant increase in the number of Level 1 complaints from the previous year, and reductions in the number

of Level 2 complaints. Level 3 complaint levels have remained steady for several years.

### Complaint Audit and Escalation

During the reporting period, approximately one quarter of the Level 3 complaints reported were initially recorded as Level 1 complaints. These were upgraded to the higher level category, either because the complainant was not satisfied with the fund's initial response or if further investigation of the matter was required.

A complaint's categorisation may be changed from Level 1 to 3 in audit. All complaints are audited by a senior member of staff, who reviews details of the complaint to ensure the complainant's concerns have been addressed and that the categorisation of complaints is accurate and consistent. If the audit shows, for example, that a complaint initially thought to be a simple (assisted referral) complaint turned out to be a more complex matter requiring further investigation, it is reclassified as a Level 3 complaint.

### Complaints Handling Procedures

The process and timeframes for the different complaint categories are shown in Figure 5.

The majority of complaints are from members of health insurers about their own insurer. However, there are instances where a complaint needs to be recorded against both the health insurer and a health care provider. This occurs, for example, where the complaint involves contradictory advice from an insurer and a hospital about how much of a hospital bill will be paid by the insurer.

Members of health insurers also lodge complaints about health care providers, including:

- hospitals (generally about inadequate information to enable informed financial consent);
- doctors (almost always about lack of informed financial consent or the gap between charges and benefits paid through Medicare and the fund); or
- other practitioners (generally about the gap between the charges and the benefit paid on general treatment policies); or
- health insurance brokers (usually related to information provided when joining an insurer).

Figure 3 Complaints Received per Year by Category

Figure 5 Steps In Handling Approaches To The Ombudsman

Category	Timeframe	Actions	Outcomes
LEVEL 1 [PROBLEM]	Immediate.	If complainant has made insufficient effort to resolve the matter with fund or provider, refer complaint to fund on behalf of complainant or empower the complainant to take the matter up directly.	Referral to health fund or provider. Complainant may also contact PHIO and request a review; these matters may then be upgraded to a Level 3 Dispute.
LEVEL 2 [GRIEVANCE]	Usually within 24 hours	Complainant provided with explanation or information to resolve matter, or explanation if there is no avenue for the Ombudsman to take up the matter.	Detailed information provided which appropriately resolves the issue.
LEVEL 3 [DISPUTE]	Depends on the nature and complexity of matter and responses from health fund and provider.	PHIO contacts health fund or provider to obtain a report, then mediates the dispute between the parties or investigates the matter further.	Explanation of health fund or provider's action; mediated resolution including payment of benefits; or formal recommendation by Ombudsman.

Overall, complaints against provider groups are small in number when compared with complaints against health insurers.

Health care providers can also lodge complaints against health insurers. These are numerically small but generally of a complex nature. Issues surrounding selective contracting and difficulties in arriving at

a satisfactory conclusion to a contract or arrangement constitute the majority of complaints from this group.

### Workload

The office received 3070 complaints (Level 1, 2 and 3) in 2010-11, an average of 255 per month compared to 218 per month in the previous year. Of those complaints, 716 were Level 3 complaints, compared to 684 the previous year.

The office closed 3142 complaints in 2010-11, an average of 262 per month compared to 218 in 2009-10. Of these complaints, 729 were Level 3 complaints compared to 694 the previous year.

The Ombudsman recorded 1216 consumer enquiries this year, compared to 1757 the previous year.

Figure 6 shows the number of complaints by month and by level. The office tends to receive

David McGregor - Director, Policy and Client Services

Figure 6 Total Complaints Received by Month

a high number of contacts during March to July each year, due to the annual premium adjustments for all health insurers.

### Time Taken to Resolve Complaints

Figures 7 and 8 provide information on the

time taken to resolve complaints this year compared to last year. There has been a small improvement in the time taken to handle complaints, with 84.1% of complaints handled within one month, compared to 82.1% the previous year and 83% the year before that.

Figure 7 Time Taken to Finalise Complaints

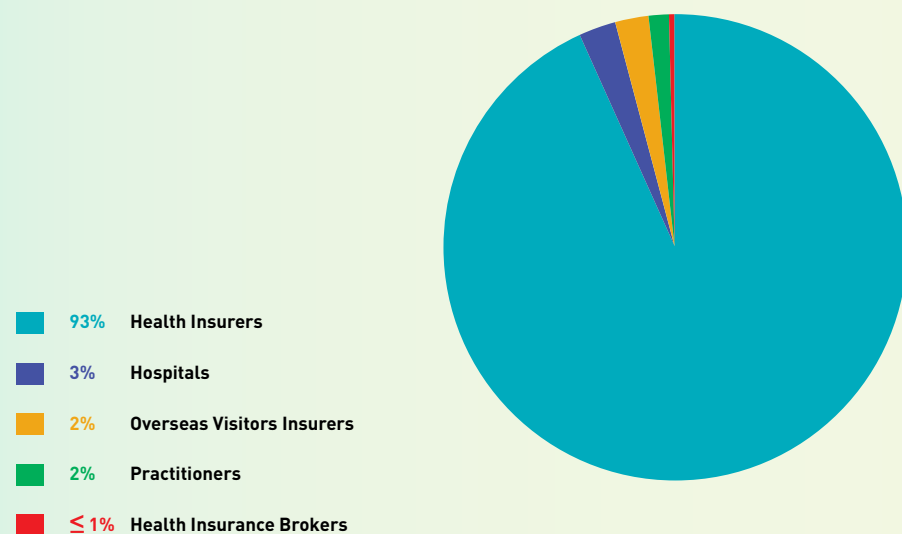

Figure 8 Complaints closed since day of lodgement 2010-11

**Figure 9 Objects of Complaint 2010–11**

### Who Was Complained About

Figure 9 shows most complaints were made about registered health insurers, followed by hospitals, overseas visitor policies, practitioners, and health insurance brokers.

### Complaints about Registered Health Insurers

Figure 10 provides a summary of all complaints (Levels 1, 2 and 3) for individual health insurers compared with their market share. This data is also presented for the higher category Level 3 complaints. Analysing the information at this further level of detail provides a more realistic picture of the way insurers respond to their members' complaints. A high ratio of Level 3 complaints compared to market share points to a less than adequate internal disputes resolution process for complex issues within the insurer.

### Complaints about Hospitals

The Ombudsman received 75 complaints about hospitals, a decrease from 138 complaints in the previous year.

Complaints about hospitals usually occur

when patients experience unexpected gaps for a hospital admission. In most cases, there are adequate processes in place in private hospitals to ensure the provision of Informed Financial Consent (IFC) to patients, so the number of complaints about unexpected gaps is low compared with the number of hospitalisations taking place each year.

In 2010-11 the office recorded 57 IFC complaints against hospitals, compared to 34 the previous year, an increase which is probably attributable to the introduction of incidental fees at some hospitals. PHIO will continue to monitor and investigate complaints about this issue for trends in the industry.

The reasons why people are faced with hospital gap charges varies. Most gaps occurred because people held policies with restrictions on certain treatments, or because patients were within waiting periods. The office also assisted a small number of consumers who were asked to pay unexpected hospital gaps because their health insurer did not have a contractual agreement with the hospital they were intending to visit.

### Complaints about Practitioners

Most complaints about doctors and practitioners concerned medical gap issues and/or a lack of Informed Financial Consent (IFC).

IFC complaints against doctors decreased in the 2010-11 year. The office registered 50 complaints against practitioners (including doctors, dentists, and other practitioners) compared to 104 in the previous year. In total, 43 complaints were made about IFC against doctors and other practitioners, compared to 130 the previous year.

### Complaints about Brokers

Most complaints about brokers concern issues relating to the information provided on joining and the level of cover chosen. There were 11 complaints about brokers in 2010-11, a small increase from 8 complaints the previous year.

### Resolving Complaints

Figure 11 shows 21% of complaints were resolved by the Ombudsman's office providing an additional and independent explanation of the member's complaint.

Fifty-seven percent of complaints were referred directly to health insurers with the assistance of

the Ombudsman's staff, on the understanding that the complainant could request a review of the complaint by the Ombudsman if they remained unsatisfied. The Ombudsman's arrangements for assisted referrals are designed to allow complainants and insurers to quickly resolve the majority of complaints using an informal approach, where the Ombudsman may suggest ways for the complaint to be resolved. Complainants are made aware that if they remain dissatisfied with the response they receive via the informal referral process, they are able to approach the Ombudsman again for a review of their case.

Nine percent of complaints were resolved by the complainant obtaining advice from the Ombudsman's office and then referring their complaint to the appropriate body themselves. Six percent of complaints were resolved by a payment by the health insurer, and six percent by another satisfactory outcome.

### Resolving Level 3 Complaints

In relation to higher Level 3 complaints investigated by the Ombudsman, 49% were resolved by giving a more detailed explanation to the member; 1% was withdrawn by the complainant; and the remaining 50% were

Figure 11 Outcome - All complaints

Figure 12 Outcomes - Level 3 Disputes

resolved by a payment or other satisfactory outcome.

These payments usually followed an investigation by the Ombudsman where the health insurer agreed that a member was entitled to a benefit payment or some other payment. In some cases, payment was made by health insurers on an ex-gratia basis; for instance, where the insurer paid a benefit the member was not entitled to under their policy. Some complaints were resolved by a hospital agreeing to reduce an account because Informed Financial Consent to out-of-pocket gaps had not been obtained from the member.

### Who Complained

The *Private Health Insurance Act 2007* allows private health insurance members, health care providers, health insurance brokers or persons acting on their behalf to lodge complaints. Overwhelmingly, 97.7% of complaints were made by health insurance members (2998). 54 complaints were made by practitioners and 16 by hospitals.

### How Complaints Were Made

64% percent of complaints were made initially by telephone, 32% were lodged through the internet or by email, 3% by letter, and less than

1% by fax, personal visit to the Ombudsman's office in Sydney or by parliamentary representation.

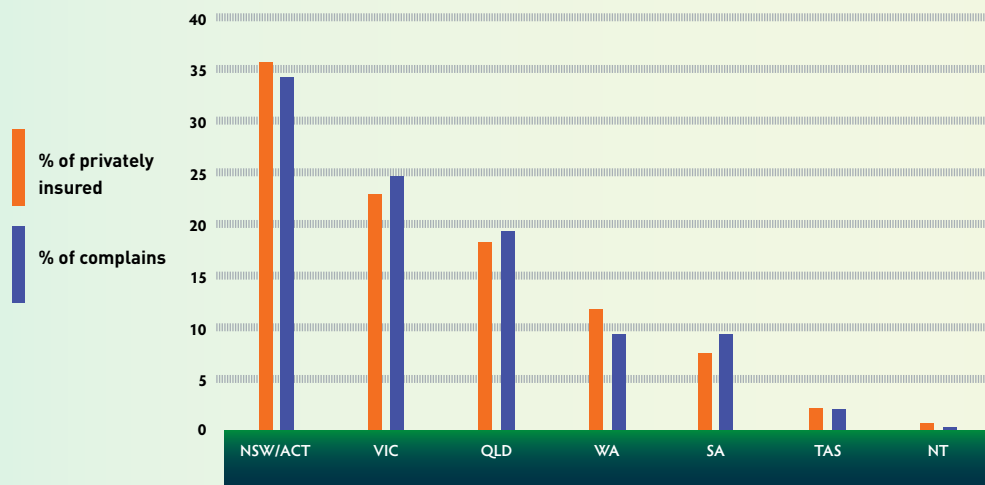

### Complaints by State/Territory

Figure 13 identifies where complaints originate on a state-by-state basis. This data is shown by state and territory, against the percentage of people who have private health insurance coverage. The figures show that Victorians and South Australians had a greater tendency to have a health insurance complaint, while Western Australians had a lower level of complaints compared to the population covered by private health insurance.

### Investigations

From 1 July 2010 to 30 June 2011 there were no investigations under section 244 of the *Private Health Insurance Act 2007* (or under the preceding Act).

Figure 13 Complaints by Population Covered by State and Territory

### Introduction

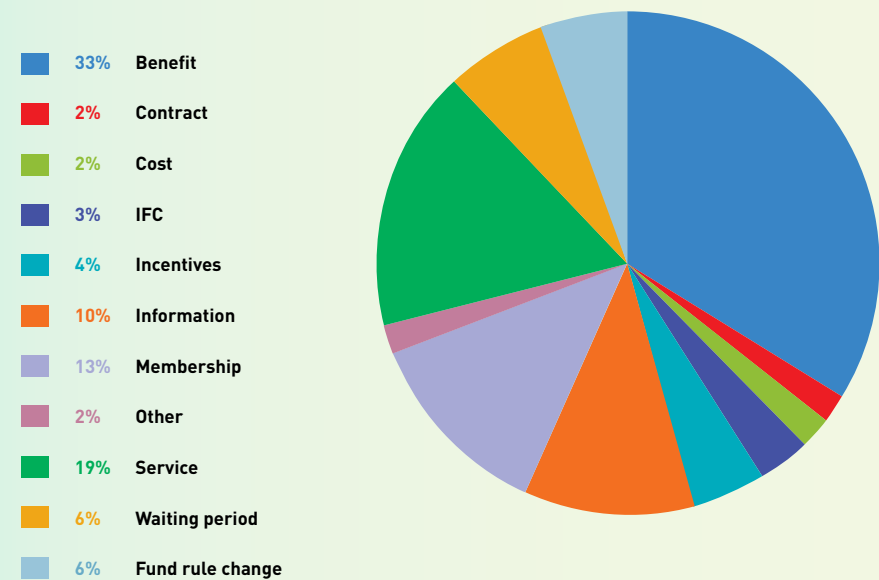

Complaints to the Ombudsman must first meet the requirements of section 241-10 of the *Private Health Insurance Act 2007*, which states that the complaint must be about a health insurance arrangement. For reporting purposes, complaints are classified in terms of broad issues and sub-issues. The most significant type of complaints concern benefits, followed by service issues, information, membership issues and waiting periods. Figures 14 and 15 (over) illustrate the proportion of complaints corresponding to each issue type.

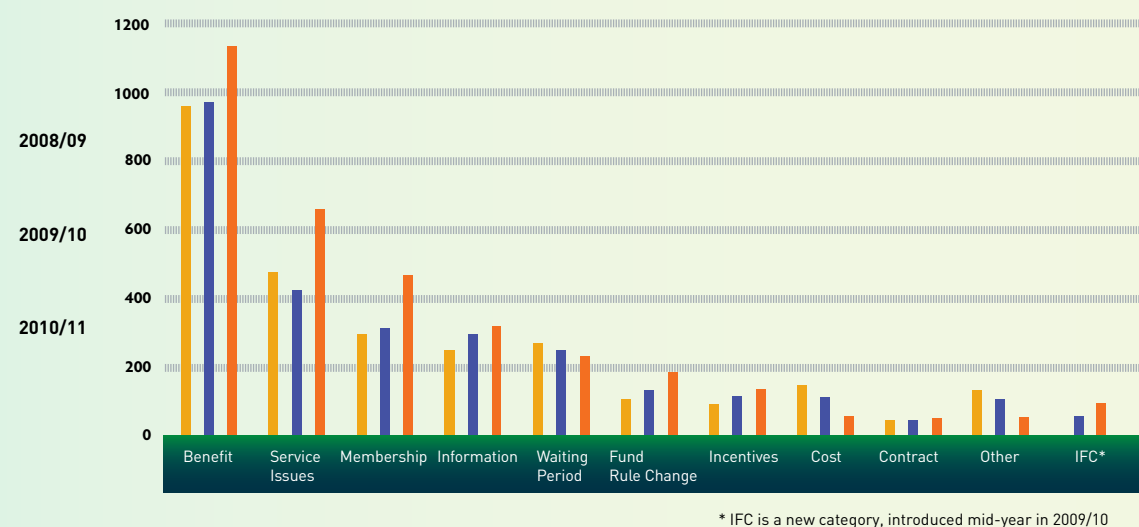

There was a significant increase in the number of complaints registered with the Ombudsman in 2010-11 compared to the previous year,

increasing from 2618 to 3070 in total. On analysing these complaints, the increase was not uniform across all issues – as shown in Figure 16 (over), certain sub-issues experienced higher increases than others, with the most significant increases for Benefit: Level of Cover and General Service Issues. The Ombudsman will continue to monitor complaints for trends within the industry.

The following case studies highlight some of the common types of complaints received by the Private Health Insurance Ombudsman. They illustrate the lessons that can be learned from complaints by both health insurers and consumers. The names, references, and some details have been changed as needed to protect the privacy and confidentiality of individuals.

Figure 14 Percentage of Complaint Issues 2010/11

**Figure 15 Complaint Issues 2008/09 to 2010/11**

**Figure 16 Complaint Sub-issues with Significant Increases**

### Benefits and Level of Cover

The most significant area of complaint to the Ombudsman's office was benefits, with a total of 1131 complaints for the 2010-11 year, a significant increase on the previous year's figure of 971. The main areas of concern

for consumers were inadequate levels of cover, delays in payment, inadequate benefit amounts, and hospital and medical gaps.

One issue which was raised with some frequency was gastric banding and other obesity-related bariatric surgeries, which are becoming more

common solutions offered to obese patients in Australia. The procedure is not cosmetic and is included in the Medicare Schedule of Benefits. However, a number of health insurance policies, especially basic policies, do restrict or exclude the service, so it is important that consumers seeking such treatment ensure their policy covers gastric banding.

Once a person has a gastric band fitted, this may not be the end of their treatment. A number of patients who have a gastric band fitted will develop a problem with the band later, so it's important for consumers to keep their cover for gastric banding and related procedures in case they develop a problem later on and require subsequent revision or removal of the gastric band in the private system.

For funds who decide to remove gastric banding benefits, to minimise complaint issues they need to pay particular attention to informing members of the full implications of such a change, especially those members who have previously used the service. The fund should provide opportunities to upgrade and be prepared to allow flexibility in exceptional cases.

### CASE STUDY:

#### Gastric Banding and Revisions

Mrs White had previously undergone Gastric Banding Surgery when she received a letter from her insurer informing her that Gastric Banding procedures would no longer be covered on her hospital policy as of 1 July 2010. The letter explained that if Mrs White wanted to continue to be covered for gastric banding procedures she would be required to upgrade her current hospital policy before 1 July, as the fund would grant continuity of cover and she would not be required to re-serve the waiting periods.

As Mrs White had already been fitted with a gastric band, she did not think it was necessary to upgrade her hospital policy to continue having cover for a procedure

she was unlikely to need again. With this in mind, Mrs White did not upgrade her hospital cover.

In December 2010, Mrs White experienced complications with her gastric band and found that she required a revision surgery to resolve the complications. Mrs White contacted her insurer to check that she would be covered for the revision procedure in a private hospital. The insurer informed Mrs White that she was no longer covered for gastric banding procedures and would need to upgrade her hospital policy and serve a 12 month waiting period before she could be covered.

It was at this point that Mrs White contacted the PHIO, as she did not believe that her health insurer had adequately warned in their correspondence that she would not be covered for any type of gastric banding surgery, including all related surgery such as adjustments, revisions and removal of the gastric band.

Mrs White had understood the information provided by the insurer meant that her hospital policy would no longer cover the initial surgery to fit the gastric band. Mrs White was of the opinion that the health insurer should have further explained in their letter that all gastric banding and related procedures would no longer be covered.

PHIO raised Mrs White's concerns with the insurer, as it is known that for this type of treatment, up to 5% of patients require follow up treatment for adjustments or removal of gastric bands due to complications. As part of its investigation, PHIO reviewed the information the fund had sent to members alerting them of this significant change in benefits. Although the insurer's letter did alert members to the change, PHIO found that the terminology used by the fund was targeted at members considering gastric banding surgery in the future.

In PHIO's view, there was a significant chance that members could misunderstand this information and conclude that the change in benefit only related to the initial surgery to fit the gastric band. There wasn't sufficient warning that this change would impact on any future complications as a result of the surgery.

The PHIO requested the insurer allow Mrs White to upgrade her cover effective 1 July 2010 with payment of the required premium adjustment. The fund agreed to this request: Mrs White paid the required premium and moved to a more appropriate level of cover, which enabled her to have her revision procedure.

### Service Issues

Another significant area of complaint was service and payment administration with 664 complaints. Of these, 462 were general service related problems and 216 were premium payment problems associated with direct debit systems. However, service issues are not usually the sole reason for members' complaints; poor customer service in combination with existing problems can cause a member to become more aggrieved and dissatisfied in their dealings with the fund, until the service itself becomes a cause of complaint.

### CASE STUDY:

#### Customer Service Delays

Ms Blue called a health insurer to obtain a quote on purchasing insurance. The insurer's salesperson quoted her for a medium hospital policy with medium extras, and advised that her hospital excess of \$500 would be waived once per person per calendar year. Ms Blue was happy with the quote and the policy, and proceeded to purchase the cover.

Two weeks later, Ms Blue called back to her new fund about an administrative matter. During the call, she asked about the \$500 excess waiver and was advised that no such waiver existed. When Ms Blue explained she had been offered the waiver in her previous call, the customer service officer said the matter would need to be reviewed by a team leader.

The customer service officer later called Ms Blue and confirmed that call recordings showed she had been given incorrect information about the waiver on joining the fund; however, the insurer would not be able to offer the waiver. Ms Blue asked to listen to the call recording herself and was advised to send the request to their service team by fax. In the same contact, Ms Blue ordered membership cards.

One week later, Ms Blue had not yet heard from the fund so she called back to check on the progress of her request and her membership cards. She was then told that the fax had not been received and nor had the cards been requested.

Finally, after calling back some days later and being advised that nothing could be done about the excess misinformation and that her cards had still not been ordered, Ms Blue contacted the Ombudsman's office. The Ombudsman was able to refer the matter to a senior person at the insurer who resolved Ms Blue's issues with a single contact.

### Membership and Premium Payments

Issues with membership and policy administration increased in 2010-11, with a total of 466 complaints. Most complaints (75%) were related to problems experienced by people when cancelling, transferring or suspending their health insurance policy. The other significant cause of complaints was issues with policies falling into arrears due to premium payment problems.

### Health Insurer Premium Increases

The Ombudsman has received a relatively low number of premium increase complaints for a number of years. This can be attributed to two developments in recent years. Average premium increases for individual policy holders have been lower, and there has been greater transparency by funds in communicating with members about the reasons for health insurance premium increases. During the year, the Ombudsman received only 58 (2%) complaints about premium increases, which was a reduction from the 75 complaints received the previous year.

### Information

Complaints about information are usually brought to the office by consumers because they have misunderstood oral advice or written information provided by an insurer in relation to benefit amounts. A total of 366 complaints about information were received, with almost 60% relating to oral advice provided by customer service staff at health insurers, and 29% relating to consumers believing they weren't advised of a change to their policy or because they didn't receive a letter.

### CASE STUDY:

#### Telephone Advice and Call Recording

Ms Green received a quote of \$1900 from her hearing aid provider for a new pair of hearing aids. Shortly after receiving the quote, Ms Green phoned her health

Leonie Hull - Principal Policy Officer

insurer to confirm her benefit entitlement before going ahead with the purchase of the hearing aids. As a pensioner, this was particularly important to Ms Green, as she was not in a position to afford a large out-of-pocket expense.

After discussing the matter with her health insurer, Ms Green had understood that she would be receiving a benefit of \$800 per hearing aid for a total benefit of \$1600, which would leave her with only \$300 to pay out of her own pocket. Based on the information she received from her health insurer, Mr Green proceeded to order and pay for a new pair of hearing aids.

However, when Ms Green lodged a claim with her health insurer, she received a significantly lower benefit than expected. Ms Green received a benefit of only \$800, leaving her with an out of pocket expense of \$1100.

Ms Green visited one of her insurer's retail centres to request a review of her claim because she felt a mistake had been made. The insurer reviewed the claim but explained that the benefit of \$800 was correct as this was the maximum amount payable for hearing aid appliances on her level of cover.

Ms Green explained to staff that she had phoned the fund prior to purchasing her

hearing aids and had been advised that she would receive a total benefit of \$1600. On hearing this, the fund agreed to review their call recordings to ascertain what Ms Green had been advised in relation to her hearing aid benefit.

Regrettably, Ms Green did not hear back from her insurer. She then contacted the PHIO, concerned that she would be left with a much larger out of pocket expense than she had anticipated.

In investigating this complaint, PHIO requested that the insurer review their call recordings from the day that Ms Green contacted the fund to check her hearing aid benefit. The response from the insurer was that they did have a call recording and were able to confirm that Ms Green had indeed been advised that she could claim \$800 per hearing aid. The insurer agreed to honour the verbal mis-information and paid Ms Green an additional \$800.

### Fund Rule Changes

PHIO received 200 fund rule change complaints during the year, higher than last year's figure of 143 complaints and part of a trend of increased complaints about this issue over several years.

The most common complaints concerned changes to hospital policies where the list of services that are covered by a policy is reduced by one or more services. Health insurers are allowed to alter the terms of health insurance policies so long as the changes comply with the requirements of the *Private Health Insurance Act 2007* and adequate notice of the change is given to consumers.

Giving adequate notice to consumers is an important obligation for insurers, as there is an opportunity for a consumer to transfer to a different health insurance policy if he or she wants to maintain cover for a benefit that would otherwise be reduced or removed. It's important for insurers to communicate

detrimental policy changes in clear and unambiguous language, and without diluting the message by interspersing unrelated promotional material.

### CASE STUDY:

#### **Communicating Changes in Hospital Cover**

Mrs Pink had been paying for a basic health insurance policy for a number of years. She initially chose a basic level of cover on the recommendation of a salesperson at the health insurer. The cover didn't include everything, but would cover her in a private hospital for most things she thought a younger person would be likely to need.

In early 2010 she received a lengthy letter from her insurer advising her that her premiums were to be increased in April and later on her policy would be changed in June. The letter included quite a number of changes, explained over two pages interspersed with messages explaining the company's reasons for increasing premiums and reducing benefits on some services. Unfortunately, important information about new exclusions on her policy was only included near the end of the letter.

Mrs Pink didn't discover the change in her circumstances until she was admitted to a hospital where she was advised by the admissions staff that she wouldn't be covered for her procedure and would have to pay several thousand dollars to receive treatment in a private hospital. The other alternative for her was to attempt to arrange treatment as a public patient. While switching to treatment in the public system after arranging private treatment is possible, PHIO often hears from consumers that it is a complex and inconvenient process: new consultations need to be arranged with doctors and the patient must join the public hospital waiting list.

Mrs Pink chose to complain to her insurer and the PHIO about the change to her

hospital policy. In its investigation, the PHIO reviewed the letter sent by the insurer containing the message that her cover had been reduced. Although the letter contained the information about the included and excluded services, this warning was at the bottom of the second page and was not given any prominence. As the policy Mrs Pink held now only covered six selected procedures, the message that most services were now not covered in a private hospital should have been highlighted under a clearly headed paragraph.

Another issue the PHIO considered was that the insurer had been waiving all waiting periods for people on this policy who phoned to upgrade cover before the changes came into effect. This offer was not advertised in the letter sent to members and was only offered if a person had understood the changes in the letter and chosen to phone the insurer to change cover.

Based on the relatively poor communication of the change to Mrs Pink, PHIO requested that the fund allow her to upgrade her cover from the date of the change and maintain cover for services, including the one she

was seeking treatment for. This outcome would put Mrs Pink back into the position that she would have been in had the mistake not have occurred. In Mrs Pink's case, if she fully understood the change to her cover she would have changed to a higher cover and started paying a higher premium from the date that her old policy conditions had changed.

### Pre-Existing Conditions

Health insurers are able to apply a twelve-month waiting period to new members if treatment is for a pre-existing condition (PEC). Details about how the PEC waiting period is applied can be obtained by referring to our brochure "Waiting Periods" and our fact sheet on Pre-Existing Conditions, which are available at [www.phio.org.au](http://www.phio.org.au) or by phoning our office.

PHIO received 149 complaints about the PEC waiting period during the year. PHIO's role in investigating complaints about this waiting period is to ensure that the fund has applied the waiting period correctly and that the fund and hospital have complied with the Best Practice Guidelines. A copy of the guidelines for the industry is also available from the PHIO website.

Amelia De Gregorio - Senior Dispute Resolution Officer, Jim Robertson - Dispute Resolution Officer, and Kaylie Blyton - Manager, Dispute Resolution

#### CASE STUDY:

##### *Pre-Existing Conditions and Requesting a Review*

Ms Grey joined her husband's existing hospital policy in November 2009 after becoming a permanent resident of Australia. Seven months after joining her hospital cover, Ms Grey experienced vomiting which worsened over a week. After visiting a GP, Ms Grey was sent for CT scans which showed she had a uterine fibroid. Following this diagnosis, Ms Grey was referred to a gynaecologist who advised that she would require surgery to have the uterine fibroid removed.

Ms Grey contacted her health fund about her pending admission and was sent PEC medical certificates. Ms Grey had the medical certificates completed by her GP and Gynaecologist and returned these to the fund. Based on the information provided by Ms Grey's doctors, the fund's medical advisor determined that the treatment was for a PEC as they deemed she would have exhibited signs and symptoms of a uterine fibroid in the six months prior to joining the fund in November 2009. In reaching

this conclusion, the fund's Medical Advisor took into account the information provided by Ms Grey's gynaecologist indicating that the fibroid was of considerable size which would have caused pressure and vomiting.

Ms Grey disputed this decision, claiming that she did not exhibit any signs or symptoms until June 2010 when she first visited a GP. She also advised her fund that she did not attend a doctor for any illness within the six-month period preceding her joining the hospital policy.

Ms Grey was not satisfied with her fund's decision and contacted the PHIO to request a review of her case. She explained that she had undergone a full medical in September 2009 as a requirement of her permanent resident visa application. This was followed by another medical check which she had performed overseas in a private hospital. She was certain that neither of these medical checks had indicated that she had a uterine fibroid and for this reason she strongly disagreed with the fund's decision to decline hospital benefits on the basis that her treatment was for a PEC.

On investigating this complaint, the PHIO contacted the fund and requested a copy of the medical certificates along with a copy of the fund's Medical Advisor's Report. In addition to this, Ms Grey was able to request a copy of her medical report from the health check she had undergone in October 2009.

In light of the new information provided to the fund's Medical Advisor for review, it was concluded that Ms Grey's uterine fibroid was not a PEC and the Medical Advisor overturned their original decision. This resulted in the fund agreeing to pay full benefits toward Ms Grey's hospital admission for the treatment of her uterine fibroid.

#### Informed Financial Consent and Hospitals

Complaints about hospitals usually occur when patients experience unexpected gaps for a hospital admission. In most cases, there are adequate processes in place in private hospitals to ensure the provision of Informed Financial Consent (IFC) to patients, so the number of complaints about unexpected gaps is low compared with the number of hospitalisations taking place each year. In 2010-11, the office recorded 57 Informed Financial Consent (IFC) complaints against hospitals, compared to 34 the previous year, an increase which is probably attributable to the introduction of incidental fees at some hospitals as discussed in the following case study.

#### CASE STUDY:

##### *Hospital Group's Mandatory Incidental Fee*

This case concerns a large hospital group charging an out-of-pocket fee to patients for the use of Foxtel and Wi-Fi services during their hospital admission. PHIO has received a significant number of complaints about this fee, as patients are required to pay the fee, regardless of whether they wish to use these services. In this case, the patient is legally blind and is not able to use

these services, yet the hospital insisted that the patient pay this fee or they would seek recovery action for the debt.

Ms Red needs medical treatment in hospital every three to four months. Ms Red presented to hospital earlier this year and was advised a \$25 fee had been introduced for every admission to the hospital for the use of Foxtel and Wi-Fi services. Ms Red protested against the imposition of this fee as she is blind and uses hearing books; she does not watch television or use Wi-Fi services. The hospital insisted Ms Red pay this fee or it would be pursued through debt recovery action. Ms Red was quite upset about this as she is a frequent patient at the hospital. Ms Red requested PHIO investigate her complaint on the basis that she was not given a choice about whether to pay the fee or not.

This case raises a number of concerns. Firstly, it does not seem reasonable to impose a fee on all patients for discretionary services that some will not wish to use or, like Ms Red, they are not able to use. In its response to this office about Ms Red's complaint, the hospital group indicated that it obtains Informed Financial Consent (IFC) from patients to incurring the fee. An important tenet of IFC is the ability of the patient to choose whether they will pay the charges or seek other treatment options if they are unable or unwilling to incur the cost.

The Ombudsman recommended the hospital group waive the fee incurred by Ms Red; refund the fees charged to other patients that have complained about the issue to PHIO, a hospital or their health insurer; and agree to charge this fee only to patients who consent to incurring it in order to have access to Foxtel or Wi-Fi services.

The hospital group agreed to waive the fee incurred by Ms Red, however, rejected the Ombudsman's other recommendations. The reason given to PHIO was that the fee is

charged for access to these services, rather than for specific use. There is a limit to the number of occasions on which the fee may be charged, and the fee is waived for certain groups such as day chemotherapy patients and psychiatric patients.

At the time of writing, PHIO is continuing to receive complaints about this issue and is seeking advice from a number of sources in resolving this matter.

### Overseas Visitors Health Cover

The Ombudsman assisted 58 consumers with complaints about Overseas Visitors Cover (for visitors to Australia); this is a decrease on the 71 complaints received in 2009-10.

Overseas visitor covers are not “complying health insurance policies” under the Act and these complaints are therefore not included in Figure 10, which lists complaints by each health insurer.

The complaints were registered across a small number of insurers who offer these policies. As market share information for overseas visitor cover was unavailable at the time of publishing, the number of complaints against each insurer has not been listed, because it would not allow a fair comparison of complaint numbers against the number of policies held.

Unlike Australian residents, overseas visitors to Australia who hold temporary visas are not eligible for Medicare benefits. Some visitors from countries with which Australia has a Reciprocal Health Care Agreement may receive medically necessary treatment in public hospitals free of charge, but are not otherwise entitled to Medicare benefits. This means that when overseas visitors need medical attention, whether that takes the form of a visit to their local GP or an extended hospital stay, they can find themselves responsible for the full cost of treatment unless they hold an appropriate level of insurance.

To insure themselves against potential medical expenses, overseas visitors can take out Overseas Visitors Health Cover (OVHC). A number of funds offer cover specifically for people who aren't eligible for Medicare benefits, including: Australian Unity, BUPA (trading as HBA and Mutual Community), HBF, HIF, MBF, Medibank Private, NIB and HCF (diplomats and certain visas only).

Some Overseas Visitor Health Cover (OVHC) policies provide similar cover to that available to Australian residents, while others can be very different. Benefits, membership costs and eligibility can vary greatly between insurers, so the Ombudsman recommends that anyone looking to take out OVHC should take care to ensure the policy they select is suitable for their

Rosie Edwards - Accounts, Tracey Salkeld - Administrative Assistant, Joanna Wong - Financial Controller, and Henny Oentojo - Executive Assistant

needs. Information to assist overseas visitors with selecting health insurance is available at [www.privatehealth.gov.au](http://www.privatehealth.gov.au).

The most common complaints investigated by the office in relation to OVHC concern waiting periods and other restrictions on the policy. Complaints about the application of the Pre-Existing Condition (PEC) waiting period tend to be complicated because information about a person's medical history before coming to Australia is held overseas. Sometimes fund members are not aware that they are not covered for PECs for periods of up to 12 months or more, and not at all with some funds.

### Changes for the Overseas Student Health Cover Deed

In 2010-11, the Ombudsman contributed to the Department of Health & Ageing's review of the Overseas Student Health Cover (OSHC) Deed. OSHC was introduced in March 1989 to provide self-funded medical and hospital cover for overseas students and their dependents.

Five insurers re-entered into Deeds of Agreement with the Department of Health & Ageing for the period of 1 July 2011 to 1 July 2016, including: Australian Health Management, BUPA Australia, Lysaght

Peoplecare (subcontracting to OSHC Worldcare), Medibank Private and NIB.

The OSHC Deed sets minimum coverage requirements which OSHC insurers are required to meet for all types of OSHC policies. It is Government policy that OSHC should be funded at no, or minimal cost, to the Australian taxpayer and should minimise bad debts to Australian hospitals, doctors and other health professionals, while ensuring that the costs of health insurance does not serve as a disincentive to prospective overseas students.

### Major changes to the Deed include:

- Insurers can choose to impose a 12-month waiting period on obstetric services, similar to Australian residents' insurance;
- Emergency treatment continues to be exempt from the 12-month pre-existing condition waiting period and has now been more clearly defined; and
- Waiting periods for both in-hospital and out-of-hospital psychiatric treatment for a pre-existing psychiatric condition has been reduced from 12 months to 2 months, providing greater protection for students with mental health issues and in line with provisions of Australian residents' insurance.

## Access and Public Awareness

The Private Health Insurance Ombudsman was established primarily for the benefit of health insurance members. It is therefore important that they know about their right to approach the Ombudsman for assistance, and for all members to be able to access the office's services.

The Ombudsman provides a speedy and informal complaints and enquiry service which is free of charge. Complaints and enquiries can be made from anywhere in Australia on a free call hotline, 1800 640 695. They can also be lodged by telephone, fax, internet form, email or by post.

People who are deaf, hearing or speech impaired can contact the office through the National Relay Service by telephone 13 36 77.

People who are non-English speakers can contact the office through the Translating and Interpreting Service by telephoning 13 14 50.

To raise public awareness of the services provided by the Ombudsman, the following strategies were employed during 2010-11:

- Details of the Ombudsman's services were referenced in various government publications and in publications produced by other agencies and consumer bodies.
- Health insurers provide information about the availability of the Ombudsman's services and contact details in brochures, publications and in some correspondence to their members. These details are also included on health insurers' websites.
- The Ombudsman also contributed to or reviewed information on private health insurance for inclusion in press articles, periodicals and public websites.

- The Ombudsman publishes a regular quarterly report which is distributed in both printed format and on the PHIO website.
- The Ombudsman hosts an internet site where consumers can access a range of brochures, Quarterly Bulletins, annual reports and fact sheets. The site enables consumers to make enquiries, lodge complaints, and request printed copies of brochures. Website users can subscribe to updates via an email newsletter or through RSS feeds. The website also links to other useful sites. The website is located at [www.phio.org.au](http://www.phio.org.au)
- The Ombudsman conducted a number of media interviews and spoke at a number of health industry conferences during the year.

## Relations with Stakeholders

The Ombudsman seeks to work in a collaborative way with its stakeholders in order to achieve the best outcome for consumers. The Ombudsman maintains regular contact with health insurer, hospital and consumer organisations. During the last year, the Ombudsman gave regular presentations to industry conferences and meetings of industry, consumer and other stakeholder associations.

The Ombudsman produces a Quarterly Bulletin containing general information about current issues and health insurance complaint statistics that is sent in printed form to members of Federal Parliament, health insurers, hospitals and others who specifically request the printed version. The Bulletin is released simultaneously in electronic form on the Ombudsman's website at [www.phio.org.au](http://www.phio.org.au).

The Ombudsman's website includes a Facts and Advice section, which provides factsheets about topics which are regularly raised by

consumers, such as why and how health premiums are assessed, and how to plan to be covered for pregnancy and obstetrics services. Factsheets on Podiatric Surgery, Assisted Reproductive Services, Plastic and Reconstructive Surgery, and Mental Health Treatment were added during this year. This area will continue to be reviewed and updated in response to consumer needs.

The Ombudsman also produces a “State of the Health Funds” report each year, to assist consumers to compare funds and make decisions about their health insurance.

The Ombudsman has a Website Reference Group comprising representatives of health insurers and the Consumers’ Health Forum which meets quarterly. The Reference Group provides advice to the Ombudsman about issues relating to the consumer website [www.privatehealth.gov.au](http://www.privatehealth.gov.au).

The Ombudsman held an industry Seminar in March 2011, focusing on consumer issues in private health. The seminar was well attended by fund and industry contacts. The presentations included:

- Dr Mark Sinclair, Chairman, Economics Advisory Committee of the Australian Society of Anaesthetists, on *Anaesthesia in 2011 and the Issue of Informed Financial Consent*;
- Ms Anna Wise, Senior Policy Manager, Consumers Health Forum, on *Private Health Insurance: What Consumers Want*;
- Mr Alastair Wilson, Acting Assistant Secretary, Private Health Insurance Branch of Department of Health & Ageing, on *Improving Private Health Insurance For Consumers*;
- Mr Shaun Gath, Chief Executive Officer, Private Health Insurance Administration Council, on *Regulating Private Health Insurance – PHIAC’s Perspective*;
- Mr Chris Wheeler, Deputy Ombudsman, NSW Ombudsman, on *Managing*

*Complainant Conduct for Better Outcomes*;

- Mr Rob Edwards, The Health Presenter on *Preventative Health*; and
- Mr Rob Seljak, Chief Executive Officer, Teachers’ Union Health and Chair, PHI Code Compliance Committee, on *Recent Changes to PHI Industry Code of Conduct*.

## Client Survey

### About the Survey

The Ombudsman regularly carries out a postal survey of randomly selected complainants. Each fortnight, surveys are posted to a sample of complainants whose cases have been closed during the previous period. The office received 128 responses (36.4%), a reasonable participation rate for a postal survey.

The aim of the survey was to gauge how well PHIO was meeting its clients’ needs and to identify areas where improvements could be made.

Overall, 88% of clients were satisfied or very satisfied with the overall handling of their complaint. This was steady from the satisfaction levels of the previous two years. This year also saw a marked improvement in the time taken to resolve complaints, with 92% of respondents happy with the turnaround time, up from 77% in the previous year.

Analysis of the results has shown that for complainants who obtain a payment or other outcome from a health insurer, satisfaction levels with the office were at 98%. This indicates that complainants correlate the service that the office provides directly with the outcome that the office is able to achieve, regardless of whether they are satisfied with the way the Ombudsman’s staff deal with their complaint.

The challenge for the Ombudsman’s office is to improve satisfaction levels for the complainants who indicated they weren’t satisfied with the Ombudsman’s office, who did not receive

**Dispute Resolution Officers – Ursula Schappi, Damien Maynard and Kate Hocknull**

an outcome to their complaint that was satisfactory from their perspective.

Practices by Health Funds and Providers in relation to private health insurance;

In summary, of the respondents to the survey:

- submission to the Productivity Commission

PHIO Client Satisfaction Results	2008/09	2009/10	2010/11
Overall Satisfaction	88%	87%	88%
Agreed that staff listened adequately	98%	96%	91%
Satisfied with Staff Manner	89%	86%	88%
Resolved complaint or provided adequate explanation	87%	89%	89%
Thought PHIO acted independently	87%	85%	85%
Would recommend PHIO to others	91%	87%	88%
Happy with time taken to resolve complaint	83%	77%	92%

## Health Policy – Liaison with Other Bodies

The Ombudsman’s office has a role in assisting with the broader issues associated with health policy. During the year, the Office provided information and assistance to various bodies involved in the formulation of health policy and compliance with established rules and laws.

Some significant activities included:

- submission to the ACCC’s report to the Senate on Anti-Competitive and Other

Study of the Performance of Public and Private Hospitals;

- consultation with State Health Departments, public hospitals and health insurers in relation to acute care certification processes for long stay private patients in public hospitals;
- submission to the Department of Health and Ageing in relation to the revision of Overseas Student Health Cover.

The consumer website www.privatehealth.gov.au was established in 2007 to provide independent information to consumers about health insurance. The website allows consumers to view a standard information statement for their own policy and compare it with other policies available for purchase. The website has been reviewed regularly since its establishment in response to feedback from consumers and to take account of industry changes.

## Usage

The website recorded 311,572 unique visitors during the year, an increase of 17% on the previous year. Analysis of the available data suggests that growth of the site's usage can be attributed to the site becoming better known via recommendations and search results, as well as regular reminders of the site's existence in annual mailings of standard information statements and Lifetime Health Cover letters.

## Website Enquiries

The "Ask A Question" feature allows consumers to ask quick questions by completing a web form. Consumers can also call for an answer on the enquiries line 1300 737 299. The feature is used by consumers who have been unable to obtain answers to general health insurance questions elsewhere on the website or by contacting individual health insurers.

The office responded to 1109 consumer enquiries through the website in 2010-11, making up 89% of the total number of enquiries received by the office.

The most frequently raised questions are about the following topics:

- Lifetime Health Cover, especially about how this affects new migrants to Australia and Australians returning from overseas. The Lifetime Health Cover rules determine how much a person pays for hospital insurance;

Tanya Snowden – Project Officer

- The Medicare Levy Surcharge for high income earners and how to avoid the Surcharge by purchasing appropriate private hospital insurance;
- Waiting periods for people who are currently uninsured;
- How to use the website, locate information and compare policies;
- How to choose a health insurance policy; and
- Overseas visitors health cover, especially for subclass 457 visa holders and student visa holders.

## Website Refresh

With the aim of improving the website's usefulness and appeal, the website underwent a full review and refresh in 2010. During the redesign and reorganisation process, PHIO consulted with consumer, industry and government stakeholders to ensure the new website would most effectively meet consumer needs.

The new website went live in July 2010 with a fresh look and new features allowing consumers to more easily find the information that they need about health insurance and to compare a range of policies. The new features include:

- Compare Policies: the new search engine and policies comparison feature allows users to search for database of health insurance policies more effectively and then compare them side-by-side.
- Average Dental Charges: the website now publishes information about the average cost of the most common dental services by state, so consumers can compare how their policies' benefits compare to costs.
- New site design: the appearance of the site has been refreshed to make it more user-friendly and visually appealing, including a restructure and streamlining of the structure of the site to remove duplicated information and make it easier to locate information.
- New Google search feature: improved search engine allows users to find the information they need more quickly.

**Figure 18 Unique Visitors to www.privatehealth.gov.au**

### Survey Results

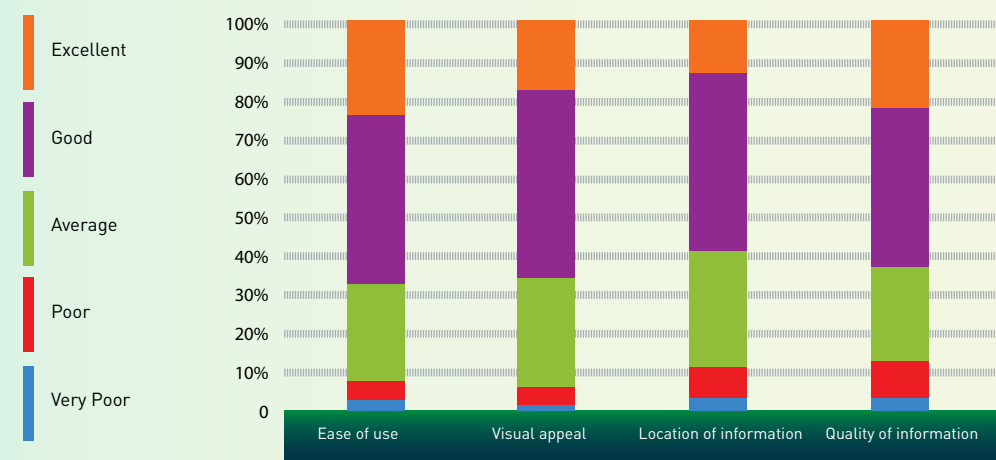

During the year, 706 users completed a survey about the website. The survey was one of a number of sources of feedback from consumers which was used to inform improvements to the website. In particular, survey respondents highlighted the difficulties they had in locating particular information they were looking for on the website. Survey results are used to highlight areas where improvements can be made to the website, to track satisfaction with the site and whether changes have been successful.

Since the website redesign went live in July 2010, feedback on both "Ease of Use" and "Location of Information" has improved considerably, and visual appeal also rates very highly. PHIO will continue to monitor user feedback and work on improving survey results. The key ratings for the site are summarised in **Figure 20**.

### Further Website Developments

In 2011, PHIO received additional funding from the Department of Health & Ageing to maintain and improve the website. Under the Memorandum of Understanding with the Department, new developments which are expected to be released in the 2011-12 year include:

- Agreement Hospitals Locator will switch to a map-based format, allowing users to more easily locate private hospitals in their area and to check with which funds these hospitals have agreements;
- Health Fund Information page design will be improved so consumers can more easily locate the information they need and also access key performance information about each fund;
- Website animated videos will provide simple, visual guides on topics including how to compare policies, the major website features, and how the private health insurance system works.

**Figure 19 Consumer Enquiries about www.privatehealth.gov.au**

**Figure 20 Website Survey Ratings for www.privatehealth.gov.au**

### Corporate Governance

Being a small office with duties specified by the *Private Health Insurance Act 2007*, the business of the Ombudsman's office is well defined. In accomplishing the tasks envisaged under the Act, there is a need for procedures to be in place to monitor both performance and process, together with the appropriate management and staff policies.

Within this environment, staffing and accounting practices provide the following framework of the office's management activities.

### Management of Human Resources

The core function of the office is to resolve complaints from consumers, practitioners, hospitals and health insurers with respect to health insurance arrangements. This involves the resolution of individual complaints and development of strategies to assist in identifying and resolving the underlying principles which lead to complaints.

The ability within a small organisation to accomplish these tasks places a significant reliance on all staff to work as a team and to fully understand the fundamentals associated with the whole private health industry. Dispute resolution staff are responsible for the day-to-day management of individual complaints and for bringing potential and actual issues which require broader investigation to the attention of the Ombudsman and the Director of Policy and Client Services. Dispute resolution staff members need to be highly trained and sourced from such disciplines as law or nursing.

### Organisational Structure

As at 30 June 2011, the permanent staff employed by the Private Health Insurance

Ombudsman comprised:

Full-time and part-time employees	Female	Male	EFT
SES 2	1	-	1
EL 2	1	1	1.4
EL 1	2	-	1.4
APS 6	3	-	2.6
APS 5	3	2	4.3
APS 4	1	-	0.4
APS 3	1	-	0.2

**EFT:** equivalent full-time employee

### Statutory Positions

The Private Health Insurance Ombudsman comprises one statutory office holder:

Officer	Position	Term	Expiry Date
Ms Samantha Gavel	Ombudsman	3 years	2014

### Staff Development and Training

During the 2010-11 financial year, \$35,084 was spent directly on PHIO staff attending training and development courses, conferences and seminars. This included the continuation of the Ombudsman's internal staff development and training program for dispute resolution staff. Staff training and development is an important priority for the office, to ensure staff members have the appropriate skills and knowledge to provide high level advice and services to consumers, as well as providing for staff career development, satisfaction and retention.

### Staff Employment Status

All Ombudsman staff members are employed under the provisions of the *Public Service Act 1999* and are required to adhere to the Public Service Values and Code of Conduct.

All staff members, other than Senior Executive Service staff, are covered under an Enterprise Agreement in accordance with the *Fair Work Act 2009*.

The Ombudsman is committed to providing a safe working environment that supports the rights, responsibilities and legitimate needs of all staff. The Ombudsman is also committed to best practice in selection, recruitment and promotion of staff in line with the merit principle.

Workplace structures, systems and procedures are in place to employees in balancing their work and family responsibilities effectively. The following table shows the numbers and status of staff who were employed on 30 June 2010.

Occupational Group	Women	Men	Total	NESB1
SES	1	0	1	0
Other	10	3	13	4
<b>Total</b>	<b>11</b>	<b>3</b>	<b>15*</b>	<b>4</b>

**SES:** Senior Executive Service, Ombudsman

**Other:** All other staff – temporary and permanent  
**NESB1:** Non-English speaking background, 1st generation

\* Includes part-time employees and those on maternity leave. Actual EFT = 11.3

### Performance Appraisal

The Ombudsman has a Performance Development Program to measure staff performance and provide for staff training and development. The Program is used to assist the Ombudsman with general staff management and annual salary reviews.

All staff members are subject to a half-yearly and an annual performance appraisal. Salary and promotion advancement is based on performance and productivity.

### Industrial Democracy

Staff members are involved in all decisions that affect their working lives and the Ombudsman's functions through regular staff meetings and dissemination of relevant written material.

### Accounting

The office utilises the MYOB suite of accounting programs internally and has contracted Complete GST Solutions for day-to-day administration of general accounting functions.

The Ombudsman has an Audit Committee, chaired by an independent Chair, Mr Neill Buck, which holds regular meetings to ensure appropriate oversight of the office's compliance with the requirements of the *Financial Management and Accountability Act 1997*.

### Outcomes and Outputs

The 2010-11 Portfolio Budget Statement (PBS) indicates that the Private Health Insurance Ombudsman contributes to the Commonwealth Department of Health and Aged Care PBS Outcome Number 9, Private Health.

The Ombudsman provides regular advice and makes recommendations about the private health insurance industry. PHIO also delivers direct services (information provision and dispute resolution). These two outputs contribute to a viable private health insurance industry by improving consumer confidence in private health insurance arrangements. A report of performance against the performance indicators established for the PHIO outputs is provided at the commencement of the *Performance* section of this report.

The Private Health Insurance Ombudsman's agency outcome is specified as *Public confidence in private health insurance, including through consumer and provider complaint and enquiry investigations, and performance monitoring and reporting*. The Ombudsman reports on achievements towards this outcome and a set of performance indicators (see the Performance section of this report for more information).

### Consultancy Services

Complete GST Solutions provided financial, accounting and reporting assistance to the office during the financial year.

P T & A Health provided services on an ad hoc basis as medical referees on cases requiring a medical opinion.

Human Solutions continued to maintain and develop the consumer website (privatehealth.gov.au) under the contract awarded in 2006. The contract was extended for a further two years and will expire in May 2013.

Resolution Consulting Services undertook a review of the PHIO's processes and controls to identify any areas of non compliance. The review concluded that the PHIO has in place processes and procedures which have adequate risk management and key controls are in place.

During 2010-11, PHIO did not engage any consultancy services of \$10,000 or more.

### Information Systems

The Ombudsman's information system is based on a Windows 2008 Network Server and the Microsoft Office suite. Accounting software used is *Mind Your Own Business (MYOB) Accounting and Asset Manager*. In addition, the Ombudsman has a purpose-built Complaints Management and Reporting system on-site. PHIO's Internet service is supplied by iiNET.

### Payroll Services

The Ombudsman continues to engage Australian Payroll Management Services to provide a payroll processing service.

### Fraud Control

Staff members are trained in fraud awareness and procedures, which are in place to notify the Australian Federal Police and/or the Director of Public Prosecutions if loss occurs as a result

of fraud. A formal fraud procedure manual has been produced and all staff made aware of their obligations and responsibilities. No cases of fraud were detected during the year. The Ombudsman has reported the agency's fraud data to the Australian Institute of Criminology in accordance with the Commonwealth Fraud Control Guidelines.

### Service Charter

The Ombudsman's Service Charter has been in operation since June 1998 and provides a framework against which the effectiveness of our service delivery can be monitored.

The Service Charter sets out what we do, the service standards our clients can expect and the steps they can take if these standards are not met. The Charter was developed in consultation with staff and clients.

### Occupational Health and Safety

The Ombudsman has a staff member who is designated as the Ombudsman's First Aid and Occupational Health and Safety Officer.

The Ombudsman complies with all provisions of the *Occupational Health and Safety (Commonwealth Employment) Act 1991*.

No reportable incidents occurred during the year.

### Equal Employment Opportunity

The Ombudsman is committed to the principles outlined in the *Disability Discrimination Act 1992* and the *Equal Employment Opportunity (Commonwealth Authorities) Act 1987*. The Ombudsman has reviewed the requirements of the Commonwealth Disability Strategy and the office complies with these requirements.

Alison Leung - Senior Project and Policy Officer and Hilary Bassingthwaighe - Director, Programmes and Education

### Advertising and Market Research

The Ombudsman did not conduct any advertising or market research in 2010-11 that meets the reporting requirements under Section 311A of the *Commonwealth Electoral Act 1918*.

### Ecologically Sustainable Development and Environment Performance

The Ombudsman is committed to the ecologically sustainable development goals of the *Environment Protection and Biodiversity Conservation Act 1999*. The Ombudsman promotes reduction in use of resources through the provision of recycling bins, ecologically mindful purchasing guidelines, and

implementation of office processes that reduce the unnecessary consumption of electricity and water.

The Ombudsman's office is located in a building that has achieved 3 Stars under the National Australian Built Environment Rating: Water and 2.5 Stars under the National Environment Building Rating: Energy. The building is committed to purchasing 25% of base building energy from Government accredited GreenPower renewable energy resources.

### Grant programs

The Ombudsman did not administer any grant programs during the 2010-11 financial year.

## Freedom of Information Statement

This statement is published to meet the requirements of *Section 8 of the Freedom of Information Act 1982 (FOI Act)*. It is correct as at 30 June 2011.

### Establishment

The Private Health Insurance Ombudsman (the Ombudsman) is established under the *Private Health Insurance Act 2007* to resolve complaints about any matter arising out of, in or connection with a private health insurance arrangement. The Ombudsman is an independent statutory agency.

### Public Information

Reforms to the *Freedom of Information Act 1982* were introduced in November 2010. These reforms included the introduction of the Information Publication Scheme (IPS) for Australian Government agencies. The scheme aims to transform the FOI framework from one that responds to individual requests for access to documents to one that requires agencies to take a proactive approach to publishing information. The scheme commenced on 1 May 2011 and the Ombudsman has published its Information Publication Plan at [www.phio.org.au](http://www.phio.org.au). The FOI Act specifies nine categories of information that agencies must publish, in addition to the information publication plan:

1. details of the agency's structure (for example, in the form of an organisation chart);
2. details of the agency's functions, including its decision making powers and other powers affecting members of the public;
3. details of statutory appointments of the agency;
4. the agency's annual reports;
5. details of consultation arrangements for members of the public to comment on specific policy proposals;
6. information in documents to which the agency routinely gives access in response to requests under the FOI Act;

7. information that the agency routinely provides to Parliament;
8. details of an officer (or officers) who can be contacted about access to the agency's information or documents under the FOI Act;
9. the agency's operational information (which is information that assists the agency to exercise its functions or powers in making decisions or recommendations that affect members of the public. This includes the agency's rules, guidelines, practices and precedents relating to those decisions and recommendations.).

### Requests

The Ombudsman received many requests for information about its activities during the year, but no official requests were received for information under the FOI Act during the reporting period.

The Ombudsman has a policy of openness with the information it holds, with the exception of any material which would be deemed exempt.

### Documents Available Free of Charge

The following brochures are available free of charge upon request:

- A brochure "Making a Complaint"
- A brochure "The Ten Golden Rules of Private Health Insurance"
- A brochure "About Our Service"
- A brochure "Doctors' Bills"
- A brochure "The Right to Change – Portability in Health Insurance"
- A brochure "Waiting Periods"
- A brochure "Health Insurance Choice"
- "The State of The Health Funds Report"
- Individual Summaries for each fund of "The State of the Health Funds Report".

Complainants can have access to material held on the complaints register and complaint files

relating to them. (Material that would be exempt from disclosure under the FOI Act may be withheld if necessary.)

### Access to Documents

People may obtain documents:

- from the office of the Ombudsman located at Suite 2, Level 22, 580 George Street, Sydney NSW 2000
- by telephoning (02) 8235 8777 or 1800 640 695 (Free-call)
- by fax on (02) 8235 8778
- by e-mail to [info@phio.org.au](mailto:info@phio.org.au)
- from the web site <http://www.phio.org.au>

## Information and Procedures for Freedom of Information Act Requests

Informal requests for access to information held by the Ombudsman's office can be made by telephone, email, personal visit or by letter. People can make the request either via the dispute resolution officer allocated to their case or that person's supervisor.

If a person wishes to make a formal request under the FOI Act, requests can be made in writing and directed to:

**Director, Policy & Client Services**  
**Private Health Insurance Ombudsman**  
 Suite 2, Level 22, 580 George Street  
 SYDNEY NSW 2000

## External Review and Scrutiny

The office subjects itself to regular review of its performance by conducting a survey of complainants. Detail of the review for this year is provided in the body of this report.

## Courts

There was no action by the Courts which directly affected the office during the year.

## Commonwealth Ombudsman

During the year, no complaints about the Private Health Insurance Ombudsman were made to the Commonwealth Ombudsman or investigations notified.

## Other

There were no other reviews conducted of the Private Health Insurance Ombudsman's office.

## Service Charter

In line with requirements for all Australian Government agencies, the Ombudsman has a Service Charter which was last reviewed during 2010-11.

The Service Charter covers all of the Ombudsman's clients and sets out the service delivery standards which they can expect from the office. The Charter was developed in consultation with staff and clients; copies of the charter are routinely sent out to people who contact the office (in the brochure "About Our Service").

The Charter includes a number of service standards and provides for a tiered system for handling complaints specifically about our service (as distinct from our work as a complaints body). The Ombudsman has a system in place for recording complaints, compliments and feedback about our service.

The key performance standards listed in the Service Charter are: *Accessibility, Timeliness, Courtesy and Sensitivity, and High Quality Advice.*

**INDEPENDENT AUDITOR'S REPORT**

**To the Minister for Health and Ageing**

I have audited the accompanying financial statements of the Private Health Insurance Ombudsman for the year ended 30 June 2011, which comprise: a Statement by the Ombudsman; Statement of Comprehensive Income; Balance Sheet; Statement of Changes in Equity; Cash Flow Statement; Schedule of Commitments; Schedule of Contingencies; Schedule of Asset Additions; and Notes comprising a Summary of Significant Accounting Policies and other explanatory information.

**Private Health Insurance Ombudsman's Responsibility for the Financial Statements**

The Ombudsman is responsible for the preparation of financial statements that give a true and fair view in accordance with the Finance Minister's Orders made under the *Financial Management and Accountability Act 1997*, including the Australian Accounting Standards, and for such internal control as the Ombudsman determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

**Auditor's Responsibility**

My responsibility is to express an opinion on the financial statements based on my audit. I conducted my audit in accordance with the Australian National Audit Office Auditing Standards, which incorporate the Australian Auditing Standards. These auditing standards require that I comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the agency's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the agency's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of accounting estimates made by the Ombudsman as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

GPO Box 707 CANBERRA ACT 2601  
19 National Circuit BARTON ACT 2600  
Phone (02) 6203 7300 Fax (02) 6203 7777

**Independence**

In conducting my audit, I have followed the independence requirements of the Australian National Audit Office, which incorporate the requirements of the Australian accounting profession.

**Opinion**

In my opinion, the financial statements of the Private Health Insurance Ombudsman:

- (a) have been prepared in accordance with the Finance Minister's Orders made under the *Financial Management and Accountability Act 1997*, including the Australian Accounting Standards; and
- (b) give a true and fair view of the matters required by the Finance Minister's Orders including the Private Health Insurance Ombudsman's financial position as at 30 June 2011 and of its financial performance and cash flows for the year then ended.

## Private Health Insurance Ombudsman

## STATEMENT BY THE OMBUDSMAN

In my opinion, the attached financial statements for the year ended 30 June 2011 are based on properly maintained financial records and give a true and fair view of the matters required by the Finance Minister's Orders made under the *Financial Management and Accountability Act 1997*, as amended.

The above schedules should be read in conjunction with the accompanying notes.

**NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES****1.1 Objectives of the entity**

The Private Health Insurance Ombudsman is an Australian Government controlled entity. The objective of the entity is to be an independent body which resolves complaints about private health insurance, and act as the umpire in dispute resolution at all levels within the private health industry.

The entity is structured to meet the following outcome:

**Outcome 1:** Public confidence in private health insurance, including through consumer and provider complaint and enquiry investigations, and performance monitoring and reporting.

The continued existence of the entity in its present form and with its present programs is dependent on Government policy and on continuing funding by Parliament for the entity's administration and programs.

Entity activities contributing toward these outcomes are classified as departmental. Departmental activities involve the use of assets, liabilities, income and expenses controlled or incurred by the entity in its own right.

**1.2 Basis of Preparation of the Financial Statements**

The financial statements are general purpose financial statements and are required by section 49 of the *Financial Management and Accountability Act 1997*.

The financial statements have been prepared in accordance with:

- Finance Minister's Orders (FMOs) for reporting periods ending on or after 1 July 2010; and
- Australian Accounting Standards and Interpretations issued by the Australian

Accounting Standards Board (AASB) that apply for the reporting period.

The financial statements have been prepared on an accrual basis and in accordance with the historical cost convention, except for certain assets and liabilities at fair value. Except where stated, no allowance is made for the effect of changing prices on the results or the financial position.

The financial statements are presented in Australian dollars and values are rounded to the nearest dollars unless otherwise specified.

Unless an alternative treatment is specifically required by an accounting standard or the FMOs, assets and liabilities are recognised in the balance sheet when and only when it is probable that future economic benefits will flow to the entity or a future sacrifice of economic benefits will be required and the amounts of the assets or liabilities can be reliably measured. However, assets and liabilities arising under executor contracts are not recognised unless required by an accounting standard. Liabilities and assets that are unrecognised are reported in the schedule of commitments or the schedule of contingencies.

Unless alternative treatment is specifically required by an accounting standard, income and expenses are recognised in the statement of comprehensive income when and only when the flow, consumption or loss of economic benefits has occurred and can be reliably measured.

**1.3 Significant Accounting Judgements and Estimates**

No accounting assumptions and estimates have been identified that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period.

**1.4 New Australian Accounting Standards****Adoption of New Australian Accounting Standard Requirements**

No accounting standard has been adopted earlier than the application date as stated in the standard. No new accounting standards, amendments to standards and interpretations issued by the AASB that are applicable in the current reporting period have had a material financial affect on the Private Health Insurance Ombudsman.

**Future Australian Accounting Standard Requirements**

New standards, amendments to standards, and interpretations issued by the AASB and are applicable to future reporting periods are not expected to have a financial impact on the Private Health Insurance Ombudsman.

**1.5 Revenue**

Revenue from the sale of goods is recognised when:

- the risks and rewards of ownership have been transferred to the buyer;
- the entity retains no managerial involvement or effective control over the goods;
- the revenue and transaction costs incurred can be reliably measured; and
- it is probable that the economic benefits associated with the transaction will flow to the entity.

Revenue from rendering of services is recognised by reference to the stage of completion of contracts at the reporting date. The revenue is recognised when:

- the amount of revenue, stage of completion and transaction costs incurred can be reliably measured; and
- the probable economic benefits associated with the transaction will flow to the entity.

The stage of completion of contracts at the

reporting date is determined by reference to services performed to date as a percentage of total services to be performed.

Receivables for goods and services, which have 30 day terms, are recognised at the nominal amounts due less any impairment allowance account. Collectability of debts is reviewed at end of the reporting period. Allowances are made when collectability of the debt is no longer probable.

Interest revenue is recognised using the effective interest method as set out in AASB 139 *Financial Instruments: Recognition and Measurement*.

**Resources Received Free of Charge**

Resources received free of charge are recognised as revenue when, and only when, a fair value can be reliably determined and the services would have been purchased if they had not been donated. Use of those resources is recognised as an expense. Resources received free of charge are recorded as either revenue or gains depending on their nature.

Contributions of assets at no cost of acquisition or for nominal consideration are recognised as gains at their fair value when the asset qualifies for recognition, unless received from another Government agency or authority as a consequence of a restructuring of administrative arrangements (refer to Note 1.7).

**Revenue from Government**

Amounts appropriated for departmental appropriations for the year (adjusted for any formal additions and reductions) are recognised as Revenue from Government when the entity gains control of the appropriation, except for certain amounts that relate to activities that are reciprocal in nature, in which case revenue is recognised only when it has been earned. Appropriations receivable are recognised at their nominal amounts.

## 1.6 Gains

### Resources Received Free of Charge

Resources received free of charge are recognised as gains when, and only when, a fair value can be reliably determined and the services would have been purchased if they had not been donated. Use of those resources is recognised as an expense.

Resources received free of charge are recorded as either revenue or gains depending on their nature.

Contributions of assets at no cost of acquisition or for nominal consideration are recognised as gains at their fair value when the asset qualifies for recognition, unless received from another Government entity as a consequence of a restructuring of administrative arrangements (Refer to Note 1.7).

### 1.7 Transactions with the Government as Owner

#### Equity Injections

Amounts appropriated which are designated as 'equity injections' for a year (less any formal reductions) and Departmental Capital Budgets (DCBs) are recognised directly in contributed equity.

#### Restructuring of Administrative Arrangements

Net assets received from or relinquished to another Government entity under a restructuring of administrative arrangements are adjusted at their book value directly against contributed equity.

#### Other Distributions to Owners

The FMOs require that distributions to owners be debited to contributed equity unless it is in the nature of a dividend. In 2010-11, there were no distributions to owners.

## 1.8 Employee Benefits

Liabilities for 'short-term employee benefits' (as defined in AASB 119 *Employee Benefits*) and termination benefits due within twelve months of the end of reporting period are measured at their nominal amounts.

The nominal amount is calculated with regard to the rates expected to be paid on settlement of the liability.

Other long-term employee benefits are measured as net total of the present value of the defined benefit obligation at the end of the reporting period minus the fair value at the end of the reporting period of plan assets (if any) out of which the obligations are to be settled directly.

### Leave

The liability for employee benefits includes provision for annual leave and long service leave. No provision has been made for sick leave as all sick leave is non-vesting and the average sick leave taken in future years by employees of the entity is estimated to be less than the annual entitlement for sick leave.

The leave liabilities are calculated on the basis of employees' remuneration at the estimated salary rates that will be applied at the time the leave is taken, including the entity's employer superannuation contribution rates to the extent that the leave is likely to be taken during service rather than paid out on termination.

### Separation and Redundancy

Provision is made for separation and redundancy benefit payments. The entity recognises a provision for termination when it has developed a detailed formal plan for the terminations and has informed those employees affected that it will carry out the terminations.

### Superannuation

The entity's staff are members of the Public Sector Superannuation Scheme (PSS) or the

PSS accumulation plan (PSSap).

The PSS is a defined benefit scheme for the Australian Government. The PSSap is a defined contribution scheme.

The liability for defined benefits is recognised in the financial statements of the Australian Government and is settled by the Australian Government in due course. This liability is reported by the Department of Finance and Deregulation as an administered item.

The entity makes employer contributions to the employees' superannuation scheme at rates determined by an actuary to be sufficient to meet the current cost to the Government. The entity accounts for the contributions as if they were contributions to defined contribution plans.

The liability for superannuation recognised as at 30 June represents outstanding contributions for the final fortnight of the year.

### 1.9 Leases

A distinction is made between finance leases and operating leases. Finance leases effectively transfer from the lessor to the lessee substantially all the risks and rewards incidental to ownership of leased assets. An operating lease is a lease that is not a finance lease. In operating leases, the lessor effectively retains substantially all such risks and benefits.

Where an asset is acquired by means of a finance lease, the asset is capitalised at either the fair value of the lease property or, if lower, the present value of minimum lease payments at the inception of the contract and a liability is recognised at the same time and for the same amount.

The discount rate used is the interest rate implicit in the lease. Leased assets are amortised over the period of the lease. Lease payments are allocated between the principal component and the interest expense.

Operating lease payments are expensed on a straight-line basis which is representative of

the pattern of benefits derived from the leased assets.

The entity has no finance leases.

### 1.10 Cash

Cash is recognised at its nominal amount. Cash and cash equivalents includes:

- cash on hand; and
- demand deposits in bank accounts with an original maturity of 3 months or less that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value.

### 1.11 Financial Assets

The entity classifies its financial assets as loans and receivables which comprises trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method less impairment. Interest is recognised by applying the effective interest rate. The agency has no loans.

### 1.12 Financial Liabilities

The entity classifies financial liabilities as Other, including supplier and other payables which are recognised at amortised cost. Liabilities are recognised to the extent that the goods or services have been received (and irrespective of having been invoiced).

### 1.13 Contingent Liabilities and Contingent Assets

Contingent liabilities and contingent assets are not recognised in the balance sheet but are reported in the relevant schedules and notes. They may arise from uncertainty as to the existence of a liability or asset or represent an asset or liability in respect of which the amount cannot be reliably measured. Contingent assets are disclosed when settlement is probable but not virtually certain

and contingent liabilities are disclosed when settlement is greater than remote.

**1.14 Property, Plant and Equipment**

**Asset Recognition Threshold**

Purchases of property, plant and equipment are recognised initially at cost in the balance sheet, except for purchases costing less than \$1,000, which are expensed in the year of acquisition (other than where they form part of a group of similar items which are significant in total).

The initial cost of an asset includes an estimate of the cost of dismantling and removing the item and restoring the site on which it is located. This is particularly relevant to 'make good' provisions in office premises taken up by the entity where there exists an obligation to restore the premises to its original state. These costs are included in the value of the entity's Leasehold Improvements asset with a corresponding provision for the 'make good' recognised.

**Revaluations**

Fair values for each class of asset are determined as shown below:

Asset Class	Fair value measured at
Leasehold improvements	Depreciated replacement cost
Property, plant and equipment	Market selling price

Following initial recognition at cost, property, plant and equipment were carried at fair value less subsequent accumulated depreciation and accumulated impairment losses. Valuations were conducted with sufficient frequency to ensure that the carrying amounts of assets did not differ materially from the assets' fair values as at the reporting date. The regularity of independent valuations depended upon the volatility of movements in market values for the relevant assets.

Revaluation adjustments were made on a class basis. Any revaluation increment was credited to equity under the heading of asset revaluation reserve except to the extent that it reversed a previous revaluation decrement of the same asset class that was previously recognised in the surplus/deficit. Revaluation decrements for a class of assets were recognised directly in the surplus/deficit except to the extent that they reversed a previous revaluation increment for that class.

Any accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the asset restated to the revalued amount.

**Depreciation**

Depreciable property, plant and equipment assets are written-off to their estimated residual values over their estimated useful lives to the entity using, in all cases, the straight-line method of depreciation.

Depreciation rates (useful lives), residual values and methods are reviewed at each reporting date and necessary adjustments are recognised in the current, or current and future reporting periods, as appropriate.

Depreciation rates applying to each class of depreciable asset are based on the following useful lives:

	2011	2010
Leasehold improvements	<b>Lease term</b>	Lease term
Property, Plant and Equipment	<b>4 to 10 years</b>	4 to 10 years

**Impairment**

All assets were assessed for impairment at 30 June 2011. Where indications of impairment exist, the asset's recoverable amount is estimated and an impairment adjustment made if the asset's recoverable amount is less than its carrying amount.

The recoverable amount of an asset is the higher of its fair value less costs to sell and its value in use. Value in use is the present value of the future cash flows expected to be derived from the asset. Where the future economic benefit of an asset is not primarily dependent on the asset's ability to generate future cash flows, and the asset would be replaced if the entity were deprived of the asset, its value in use is taken to be its depreciated replacement cost.

**Derecognition**

An item of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal.

**1.15 Intangibles**

The entity's intangibles comprise internally developed software for internal use. These assets are carried at cost less accumulated amortisation and accumulated impairment losses.

Software is amortised on a straight-line basis over its anticipated useful life. The useful lives of the entity's software are 5 years (2009-10: 5 years).

All software assets were assessed for indications of impairment as at 30 June 2011.

**1.16 Taxation**

The entity is exempt from all forms of taxation except Fringe Benefits Tax (FBT) and the Goods and Services Tax (GST).

Revenues, expenses and assets are recognised net of GST except:

- where the amount of GST incurred is not recoverable from the Australian Taxation Office; and
- for receivables and payables.

<b>Total</b>	<b>33,285</b>	<b>33,285</b>	<b>142,490</b>	<b>142,490</b>

**NOTE 11C: CREDIT RISK**

The Private Health Insurance Ombudsman's maximum exposure to credit risk was the risk that arises from potential default of a debtor.

and mechanisms available to the Ombudsman and internal policies and procedures put in place to ensure there are appropriate resources to meet its financial obligations.

**NOTE 11D: LIQUIDITY RISK**

The exposure to liquidity risk is based on the notion that the Private Health Insurance Ombudsman will encounter difficulty in meeting its obligations associated with financial liabilities. This is unlikely due to appropriations funding

**NOTE 11E: MARKET RISK**

The Private Health Insurance Ombudsman holds basic financial instruments that do not expose the Ombudsman to certain market risks.

The Ombudsman is not exposed to currency risk or other price risk.

**NOTE 12: APPROPRIATIONS**

**TABLE A: ANNUAL APPROPRIATIONS ('RECOVERABLE GST EXCLUSIVE')**

	2011 Appropriations			Appropriation applied in 2011 (current and prior years) \$	Variance \$
	Appropriation Act	FMA Act	Total appropriation		
	Annual Appropriation \$	Section 31 \$

Plus: non-appropriated expenses		
Depreciation and amortisation expenses	313,695	-
<b>Total comprehensive income (loss) attributable to the entity</b>	<b>587</b>	<b>81,453</b>

\* As per the Statement of Comprehensive Income.

## Glossary

**Agreement hospital:** Private hospital or day surgery contracted with an insurer to provide services at low or no out-of-pocket costs.

**Benefit:** The amount paid by the insurer for a specific service.

**Broker:** A person or organisation which sells private health insurance on behalf of a health insurer.

**Department of Health & Ageing:** The commonwealth government department is responsible for policies relating to private health insurance.

**Health care provider:** a provider of medical services or treatment; may refer to a hospital, doctor, dentist, or other practitioner.

**Health insurer:** Organisation which provides private health insurance organisation, also known as a health fund.

**Fund:** Private health insurance provider.

**Gap fee:** The amount you pay out of your own pocket for treatment in hospital, either for medical or hospital charges over and above what you get back from Medicare or your private health insurer. Some health insurers have gap cover arrangements to insure against some or all of these additional payments.

**General treatment cover/policy:** Health insurance to cover non-hospital medical services that are not covered by Medicare, such as dental, optical, physiotherapy, other therapies and ambulance. Also known as 'extras' or 'ancillary' cover.

**Hospital cover/policy:** Health insurance to cover your costs as a private patient in hospital, including hospital accommodation and medical treatment.

**Hospital Provider Purchaser Agreement:** The contract between an insurer and a private hospital to provide services at low or no out-of-pocket costs.

**Informed Financial Consent:** The provision of cost information to patients; including notification

of likely out-of-pocket expenses (gap fees), by all relevant service providers, preferably in writing, prior to admission to hospital.

**Insurer:** Private health insurance provider.

**Lifetime Health Cover:** A Government initiative introduced from 1 July 2000 that determines how much you pay for private hospital insurance, primarily based on your age.

**Medicare:** an Australian Government agency that delivers universal public healthcare to the Australian community.

**Medicare Benefits Schedule:** The schedule of fees set by the government for standard medical services.

**Medicare Levy Surcharge:** an income tax levy that applies to Australian taxpayers who earn above a certain income and do not have private hospital cover.

**Overseas Student Health Cover:** A type of health cover designed for overseas students which can be purchased from some Australian private health insurers. It is a requirement to hold this type of insurance under certain visas.

**Overseas Visitors Health Cover:** A type of health cover designed for people without Medicare benefits which can be purchased from some Australian private health insurers, and some international or general insurers.

### Private Health Insurance Administration

**Council:** An independent Statutory Authority that regulates the private health insurance industry.

**Rebate:** A federal government subsidy of between 30 and 40% of the cost of private health insurance.

**Waiting period:** How long you need to be a member of a policy before you are eligible for benefits. The Government has set maximum waiting periods for benefits for hospital services, but insurers can set their own waiting periods for general treatment cover.
